*For Howard Phillips, "work" is definitely "play."*

Howard Phillips' official title at Nintendo of America is Product Analysis Manager. Most everyone else knows him as one of the premier video game experts in the country.

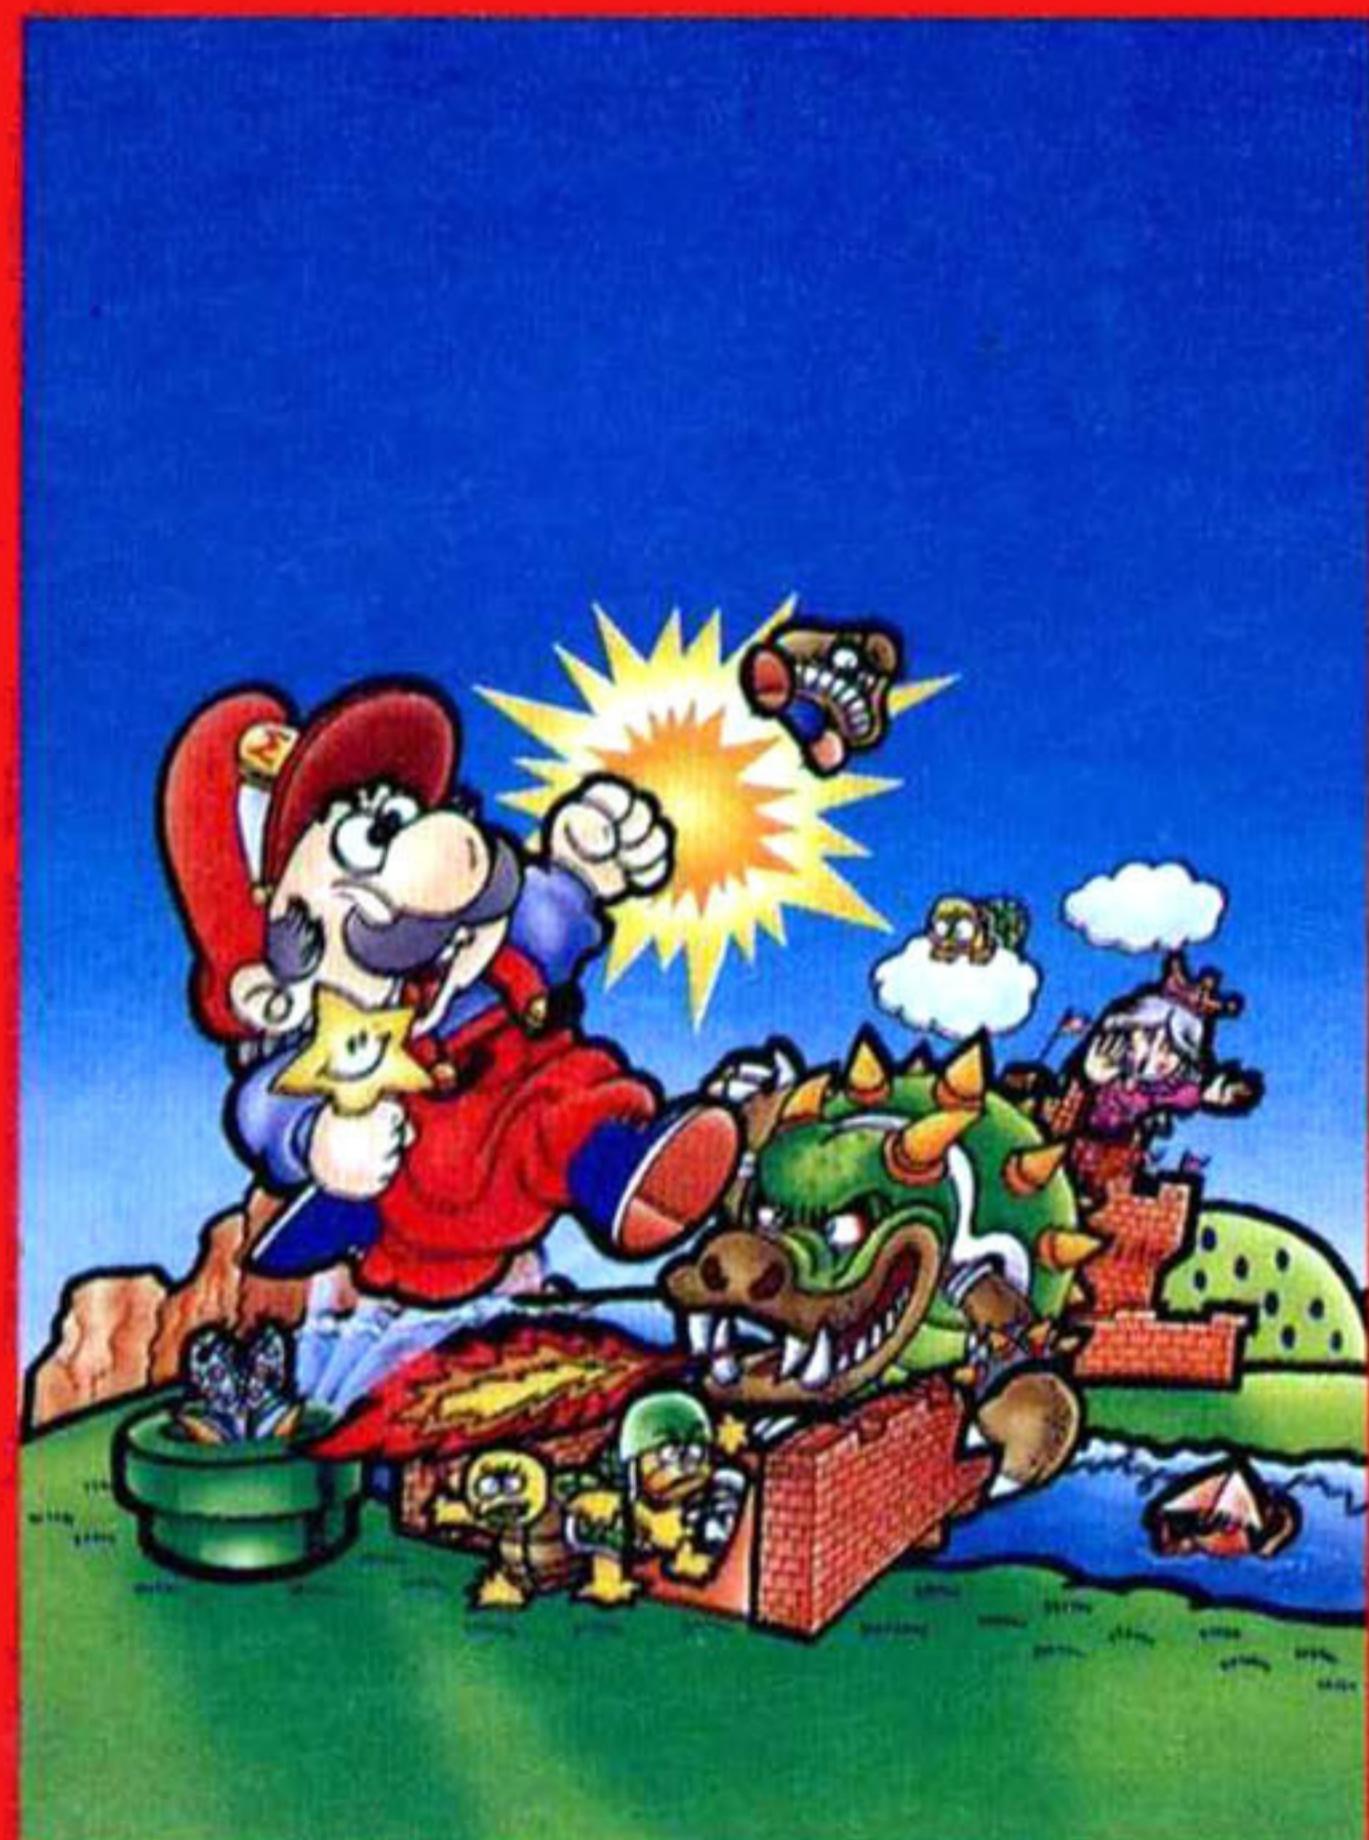

Howard has a great deal of influence on which arcade hits will become Nintendo home video games and sometimes vice versa. It was his idea to adapt Super Mario Bros. into an arcade game, and to publish this book for U.S. players. Both efforts helped lead this exciting game to its overwhelming success.

First a best-seller in Japan, the book's secret strategies, tips and maps showed Japanese players how to master Super Mario Bros. – instead of letting the game master them. This new English language edition is now available to U.S. players for the first time.

Recently, Howard helped Nintendo establish its "Fun Club," a nationwide organization of video game lovers. As its president, he develops and oversees all the competitions, activities and special offers that are open exclusively to Nintendo Fun Club members.

### **UNDERWATER WORLD**

TO AVOID GETTING SUCKED DOWN THE DRAIN, YOU HAVE TO SWIM LIKE CRAZY!

The Mushroom Kingdom is divided into 8 worlds with 4 levels in each, providing a total of 32 levels to conquer! In each level, Mario encounters deadly enemies which he can shoot with FIREBALLS or stomp out. The following moves, however, are deadly to MARIO:

- 1) Bumping into flames, or members of the Turtle Tribe, or other dangerous creatures.
- 2) Running into a Troopa that you kicked out of the way, but didn't destroy.
- 3) Falling into a pit or a drain.
- 4) Running out of time before you make it to the castle.

# THE MYSTERY OF MARIO

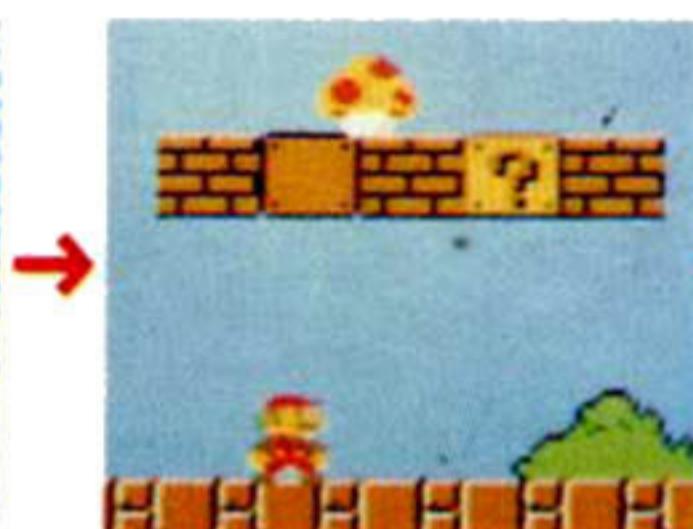

A variety of POWER BOOSTERS can transform MARIO in three ways. SUPER MARIO: MARIO gets big, then if attacked by an enemy, he shrinks back to regular size, and continues the game. FIERY MARIO: MARIO shoots deadly FIREBALLS. INVINCIBLE MARIO: Enemies have no power over him—for a time.

## 1. THE POWER BOOSTER MUSHROOMS:

The POWER BOOSTER MUSHROOMS are typically hidden in blocks. But sometimes they appear out of thin air. Either way, MARIO has to punch up from below to get them.

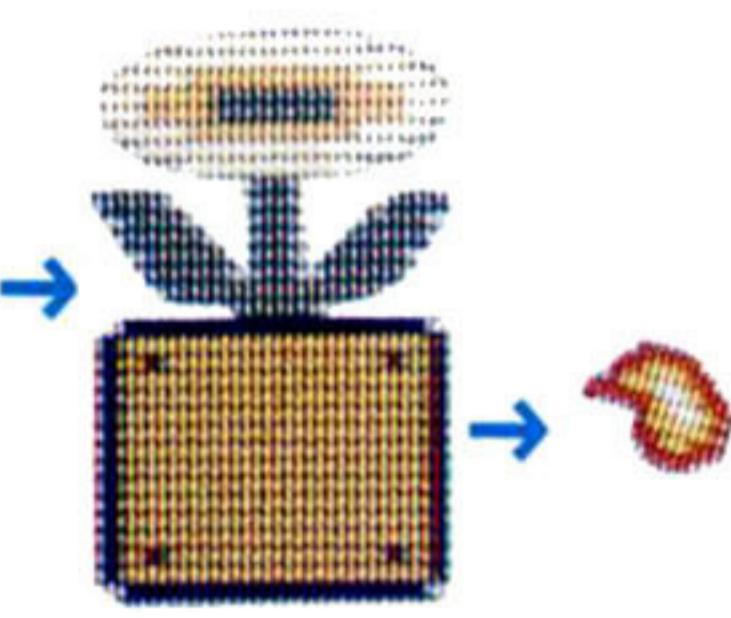

MARIO

POWER BOOSTER MUSHROOM

Only SUPER MARIO can jump high enough to get the FIRE FLOWER which can turn him into a FIERY MARIO who can shoot enemy-blasting FIREBALLS.

FIRE FLOWER

SUPER  
MARIO

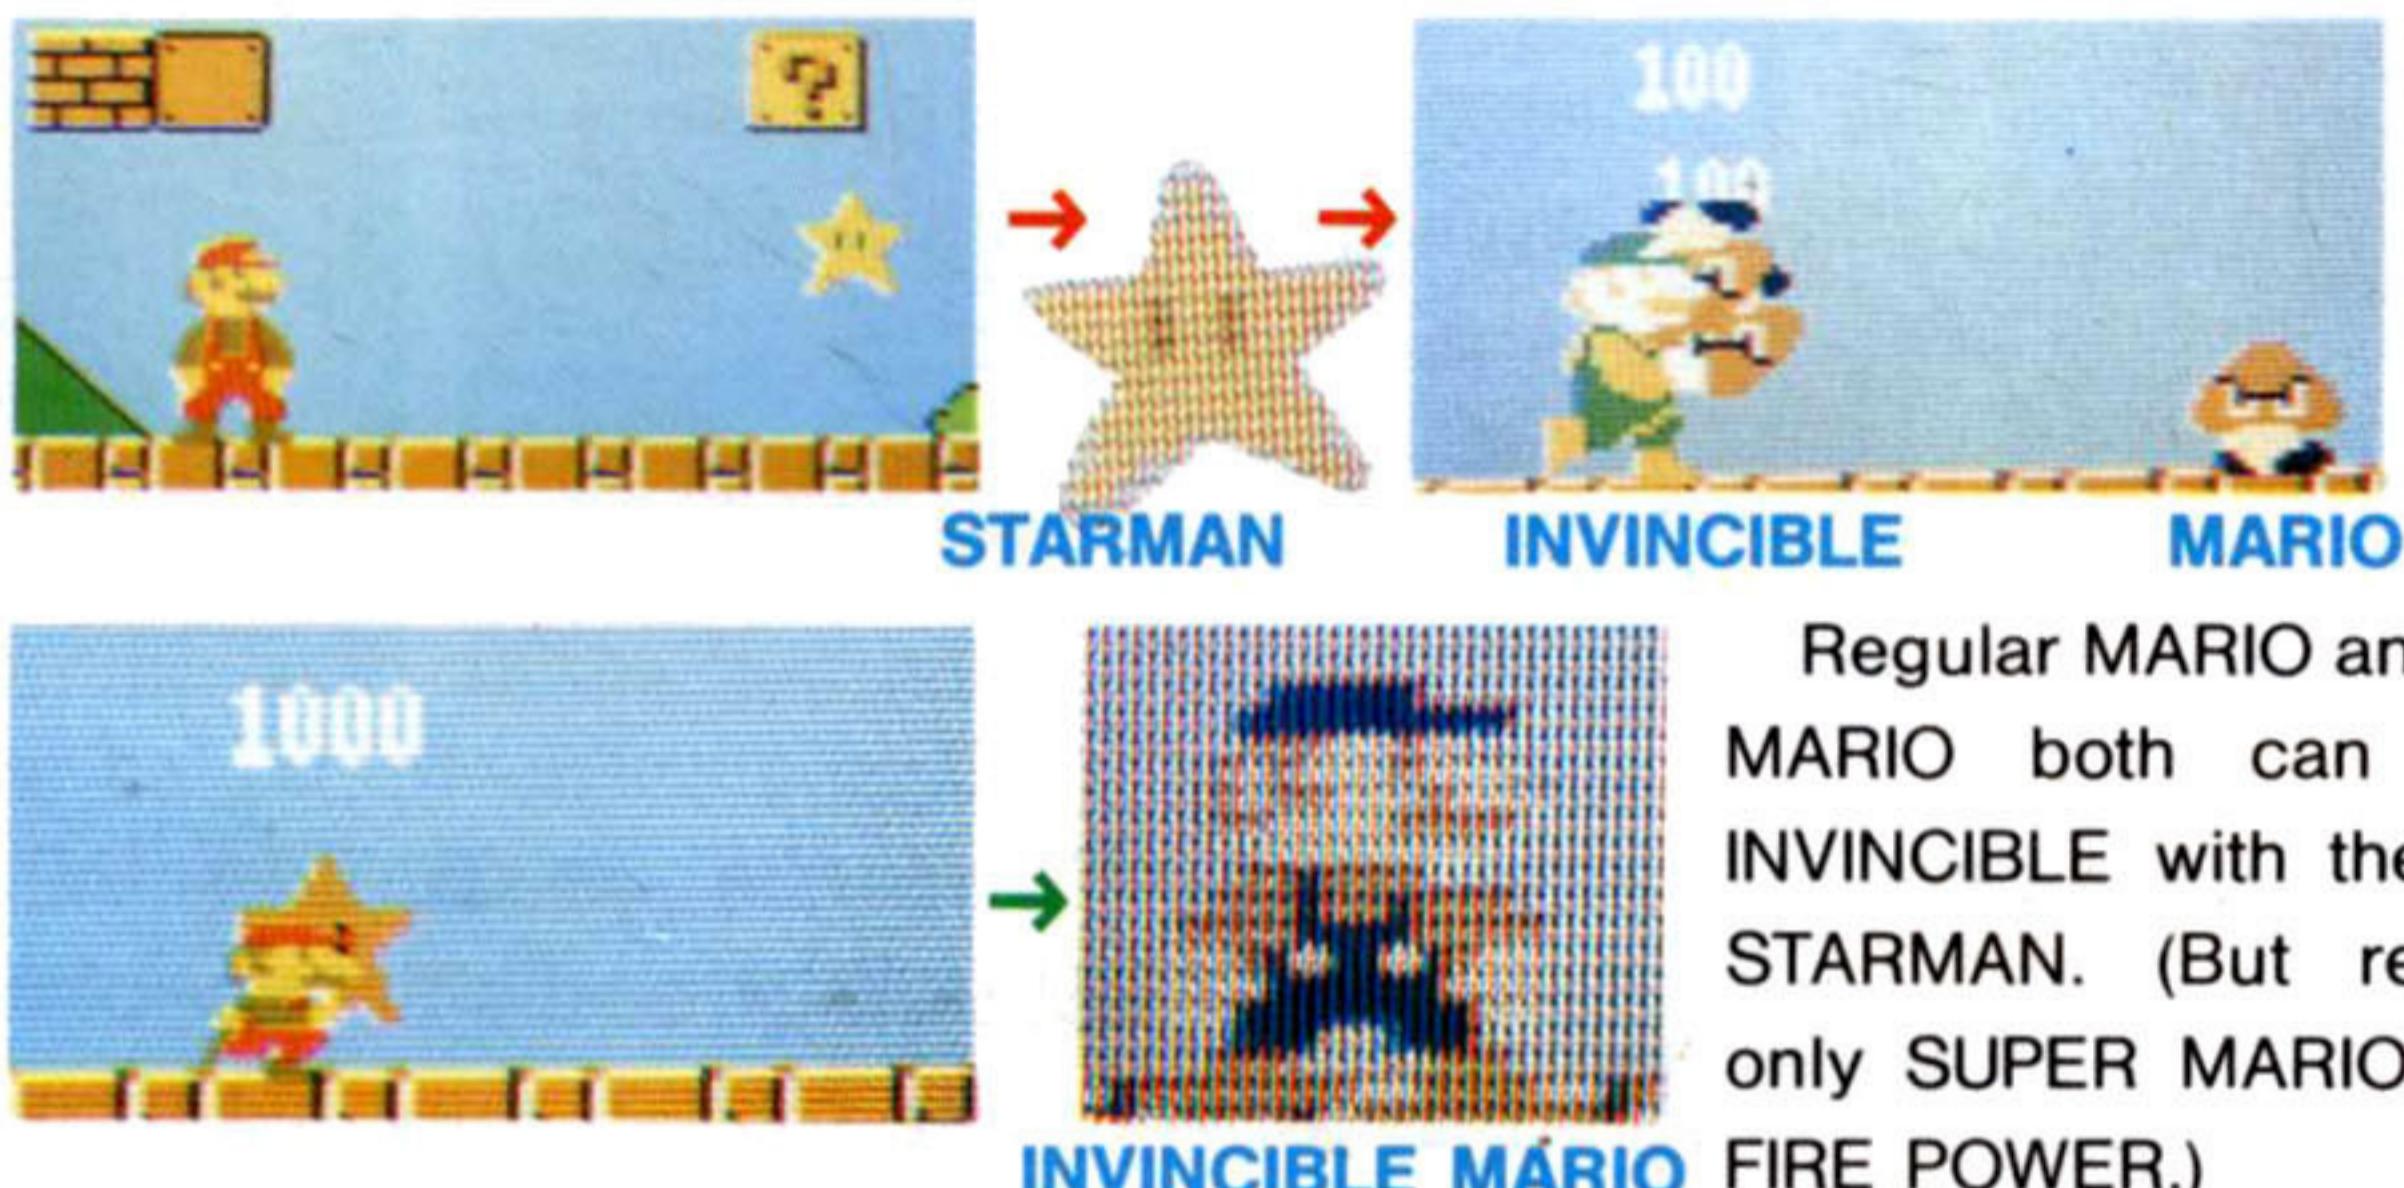

FIERY MARIO

# MARIO'S TRANSFORMATION

## 2. BECOME INVINCIBLE AND BLOW YOUR ENEMIES AWAY!

To become INVINCIBLE, MARIO has to catch the STARMAN. Enemies are powerless over INVINCIBLE MARIO, but only for about 30 seconds. Listen to the music!

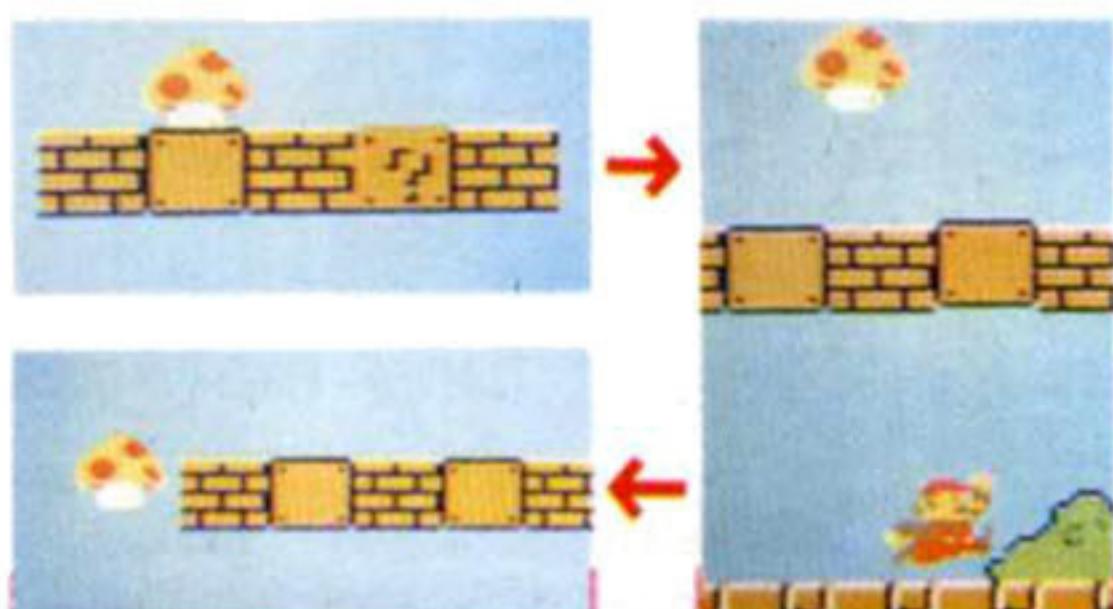

Regular MARIO and SUPER MARIO both can become INVINCIBLE with the help of STARMAN. (But remember, only SUPER MARIO can get FIRE POWER.)

And two can play the game! Mario has a brother named LUIGI—another hero determined to save the Princess.

### DON'T LET THE POWER BOOSTERS ESCAPE!

When the POWER BOOSTERS first appear, they move right. Run fast to catch them! Sometimes they bump into something, and come back towards you. Other times, you even have to jump for them. Don't miss!

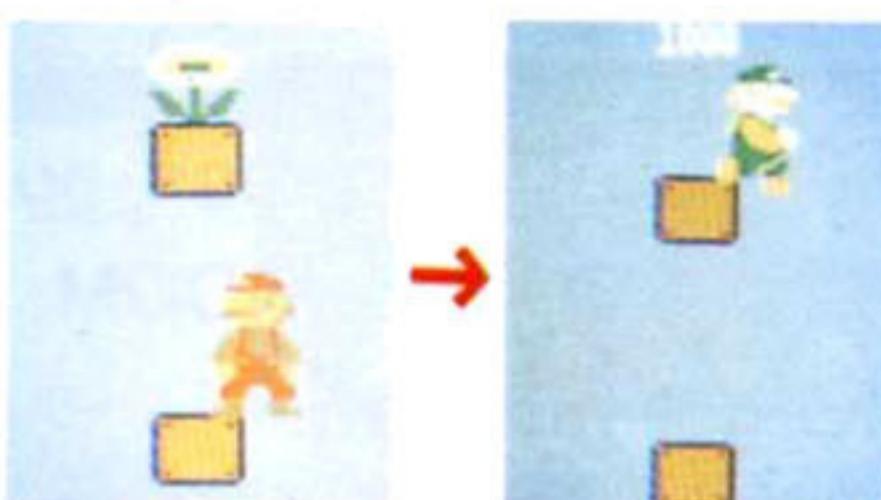

LUIGI

SUPER LUIGI

### TIPS ON HARD-TO-REACH PLACES

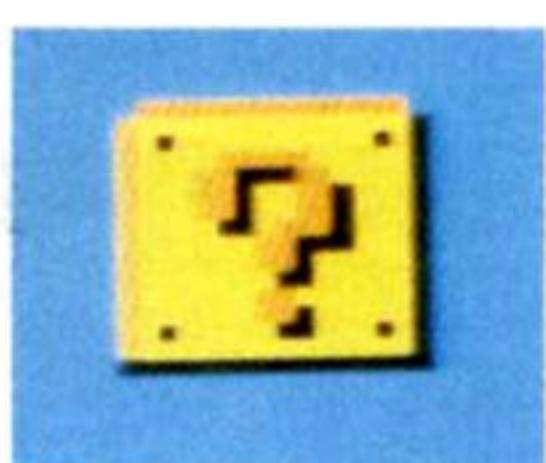

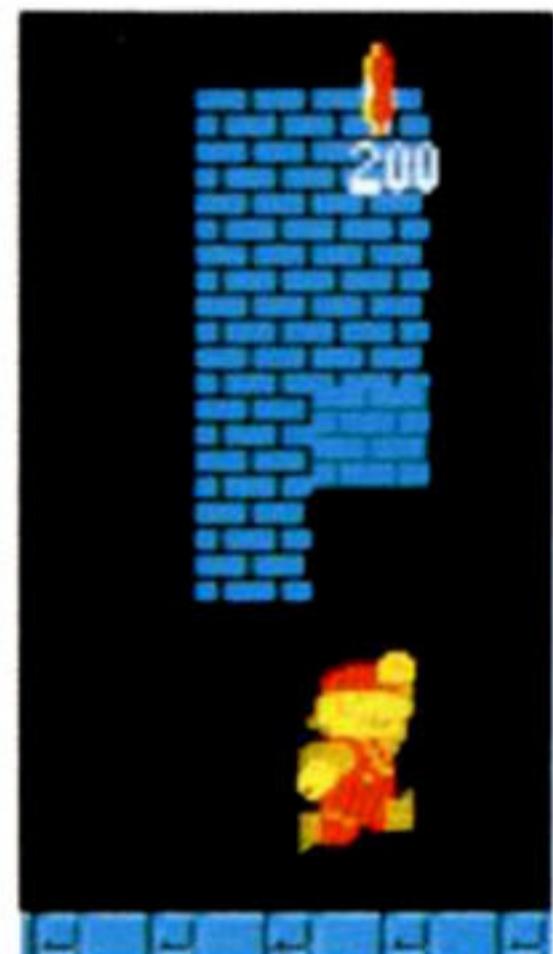

Use the ONE-FOOT-JUMP (see photo) to catch POWER BOOSTERS in hard-to-reach places.

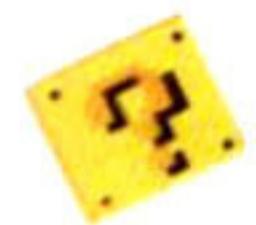

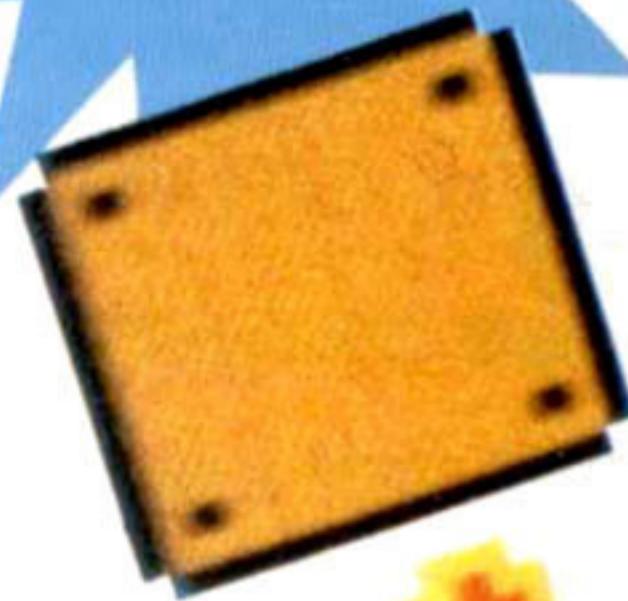

# PUNCHING THROUGH BLOCKS

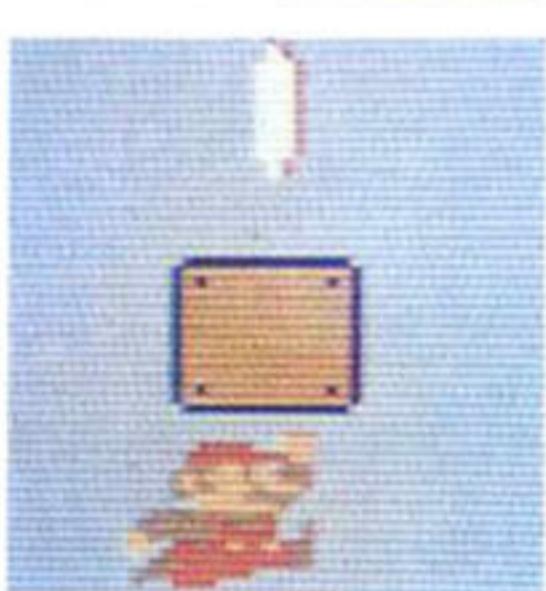

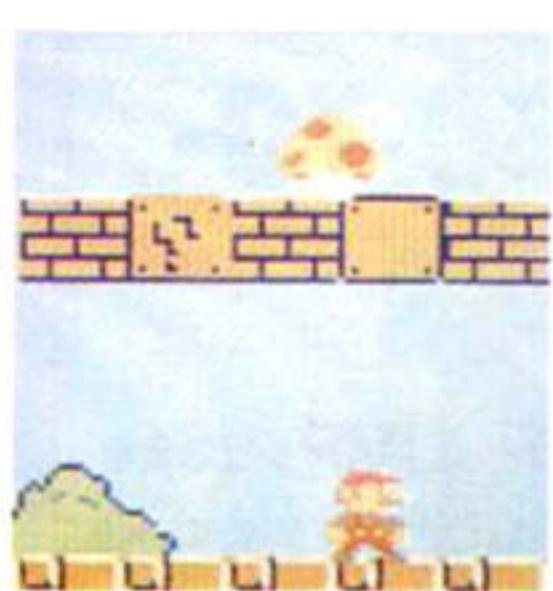

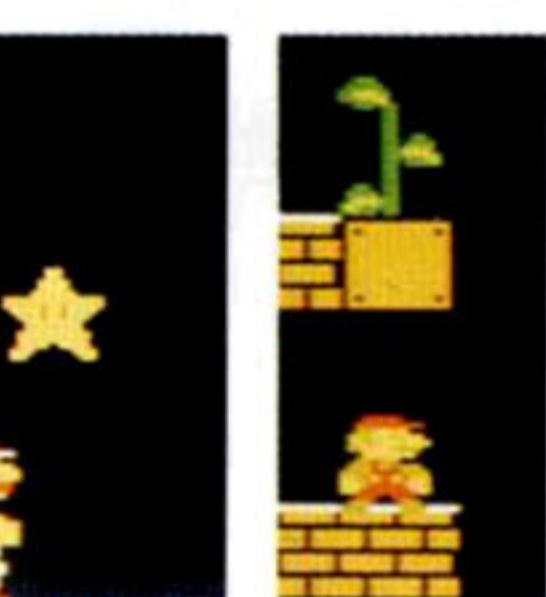

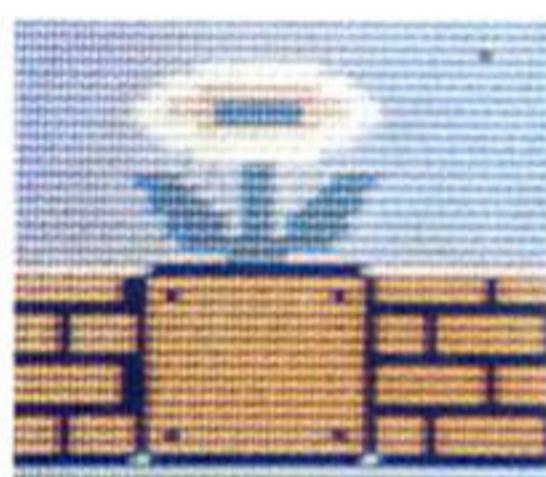

## TYPES OF BLOCKS

There are breakable blocks (SUPER and FIERY MARIO only), unbreakable blocks, and blocks containing hidden secrets. Some blocks appear out of thin air when you jump up.

## THE ? BLOCKS

Inside ? blocks you'll find POWER BOOSTERS, COINS, and other special surprises. Regular blocks may also contain POWER BOOSTERS and 10 COINS, therefore, every block is worth a punch, but don't run out of time!

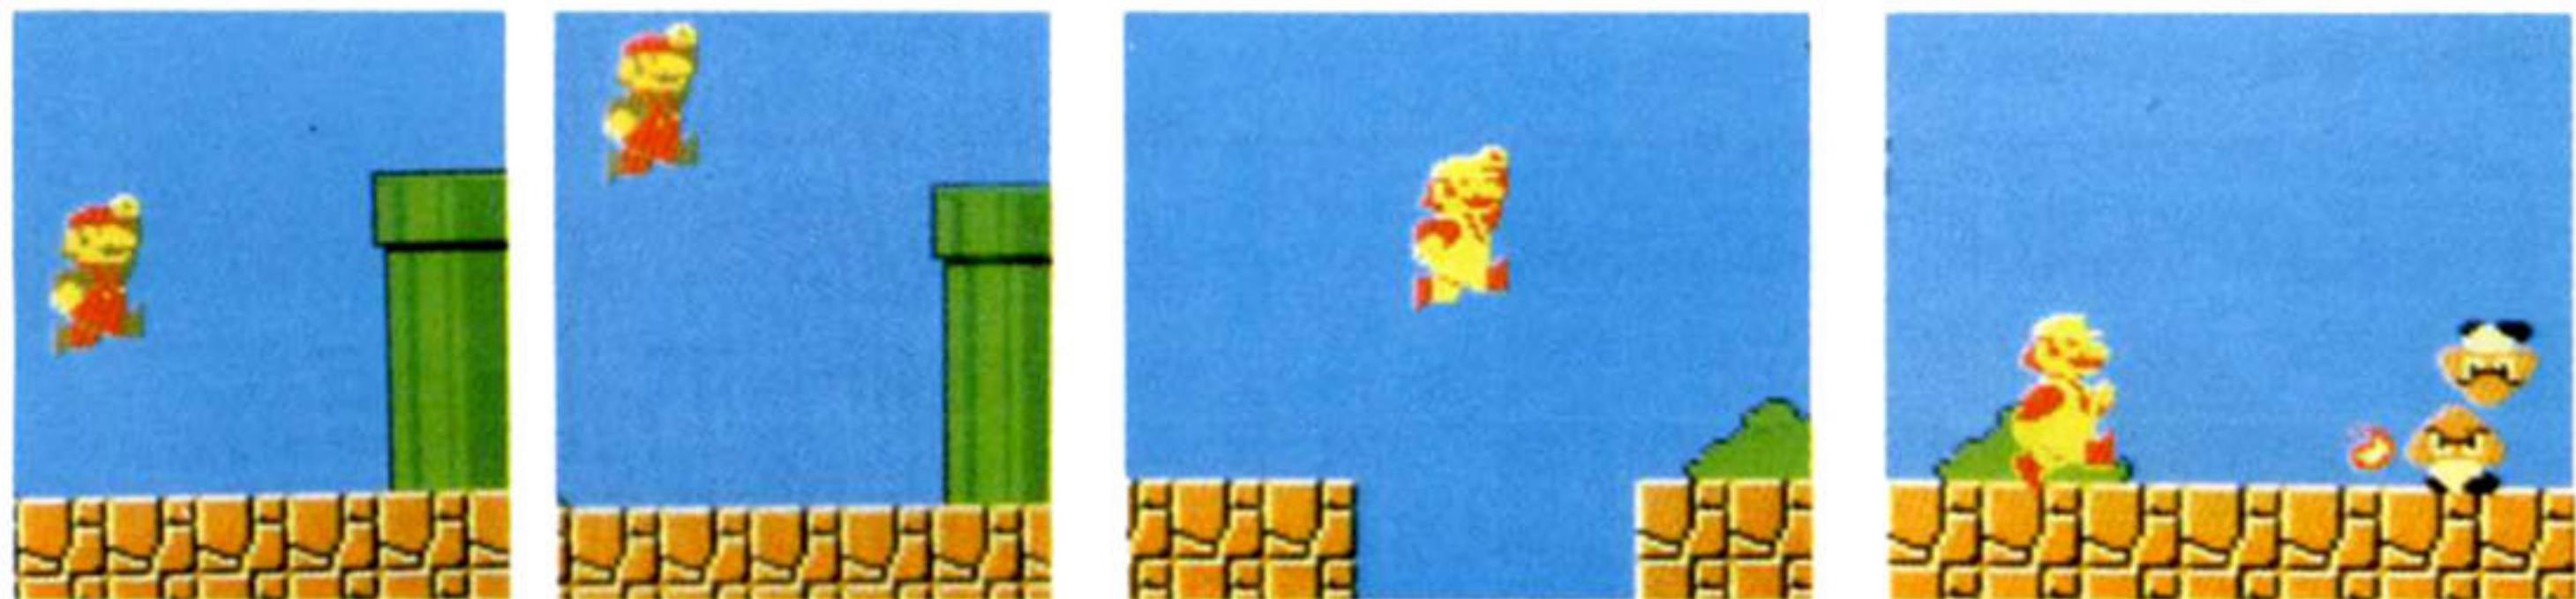

### A SPECIAL MUSHROOM OFFERS NEW LIFE

When you find a green-polka-dot mushroom, catch it! It's a 1-UP EXTRA MAN MUSHROOM. Listen for the little tune that means MARIO got his man.

# HOW TO USE THE CONTROLLER

These buttons control MARIO'S speed and the height of his jump. Remember, however, that MARIO can't stop immediately. A small controller error can send him into a bottomless pit.

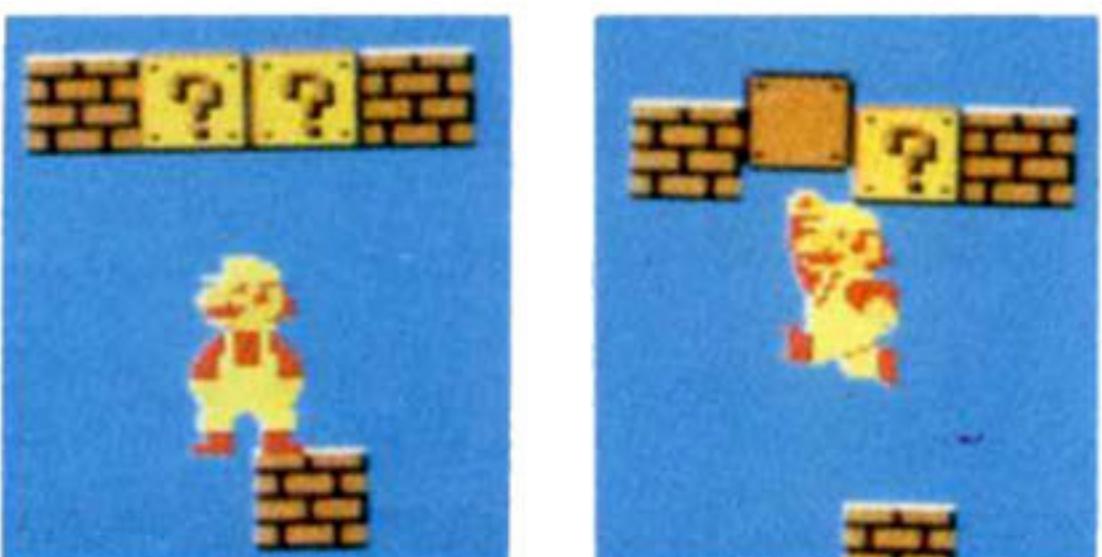

The height of your jump is determined by how long you hold down the "A" button. For long jumps, use the "B" button and accelerate before you jump. Practice gives you "the jump" on the enemy.

To jump over large, FIERY MARIO can use B button and use the FIREBALL ("B" accelerate before button) repeatedly to you jump.

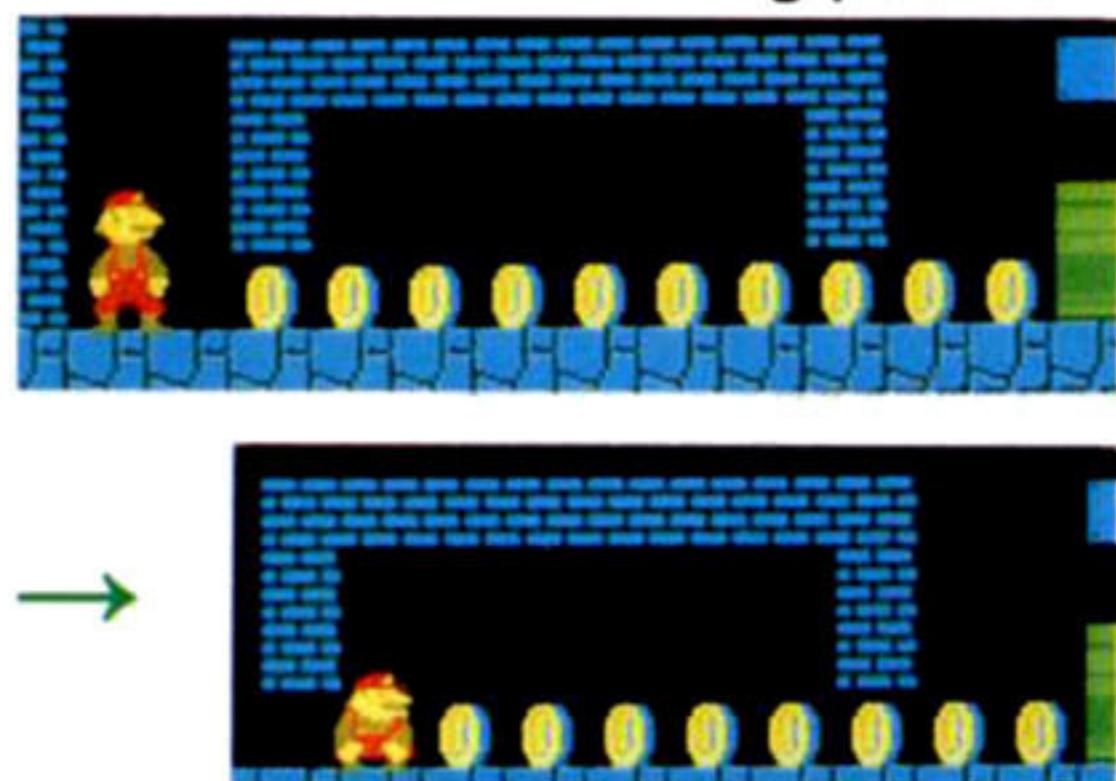

## HIGH JUMP FOR OVERHEAD BLOCKS

When your target is positioned like the one in the photo, move until you have one foot in midair and jump up. It's easy!

## TIPS FOR HARD-TO-FIT PLACES

If you have problems getting to coins under or on the blocks, try this trick: Run and hold the down side of the + button. This will allow MARIO to slide under the block in a kneeling position.

# KNOW YOUR ENEMY

## LIST OF ENEMY CHARACTERS (THE TURTLE TRIBE)

The Turtle tribe is made up of seventeen species. The only thing they have in common is their desire to get MARIO! They all have different ways of accomplishing this goal. It's important to know all their attack patterns. Watch out. Some of the Turtle Tribe are indestructible.

### LITTLE GOOMBA

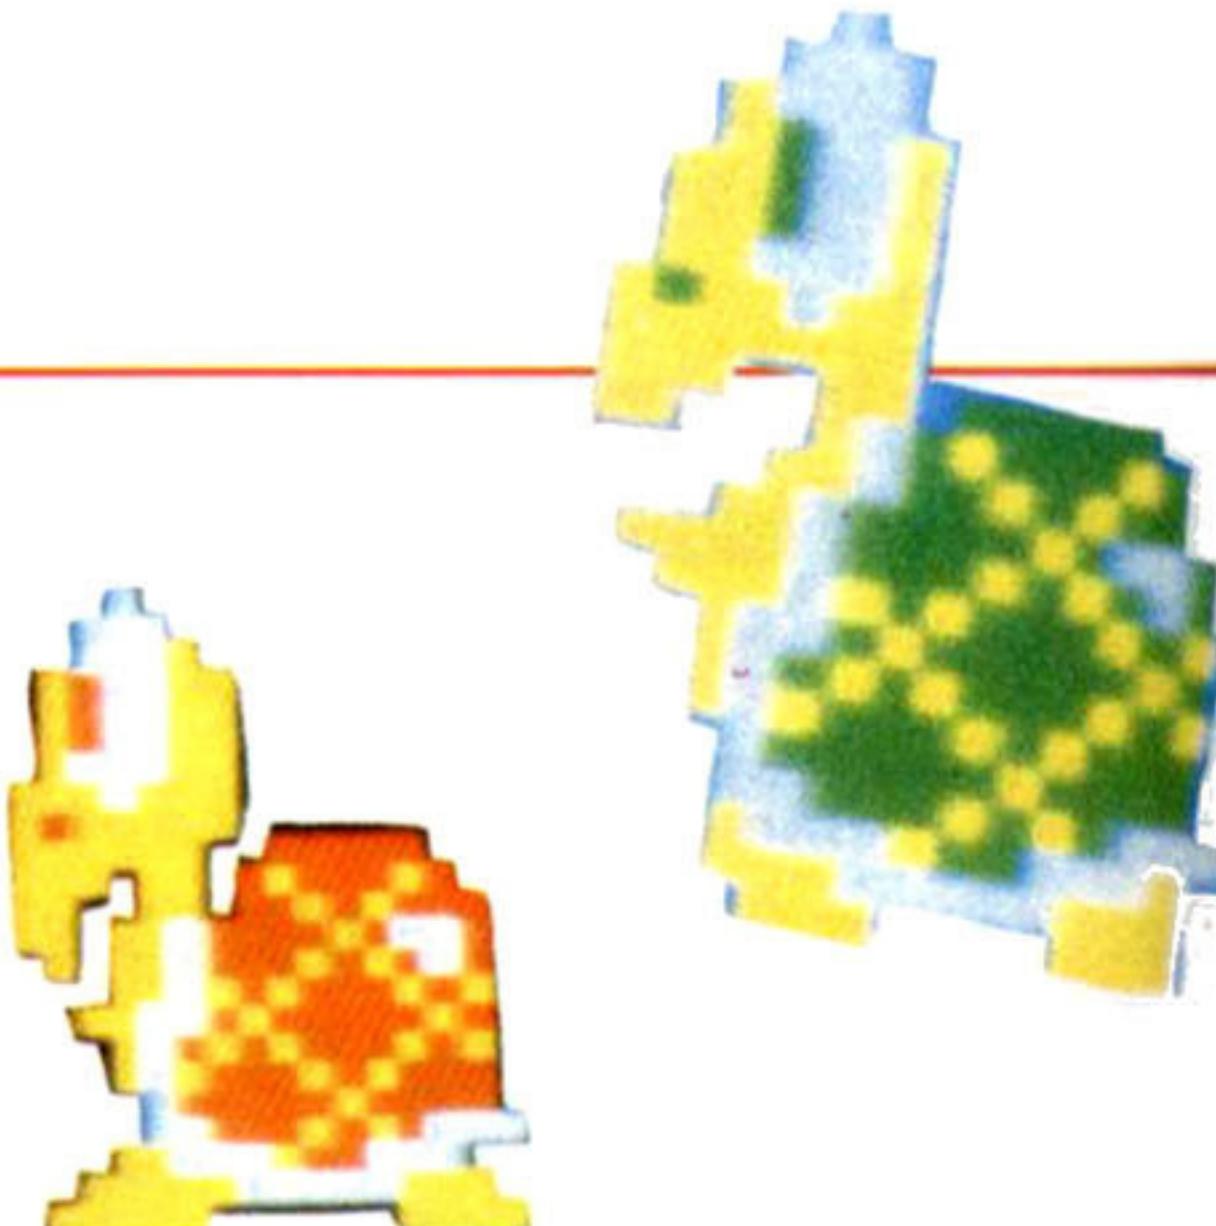

These are the "baddies" that betrayed the Mushroom Kingdom. They go for MARIO in a straight line, and are easily trounced with one attack.

### KOOPA TROOPA

The GREEN TROOPAS always charge MARIO in a straight line. The RED TROOPAS pace back-and-forth within a given area. Timing is everything! A stomp stops them, but not for long.

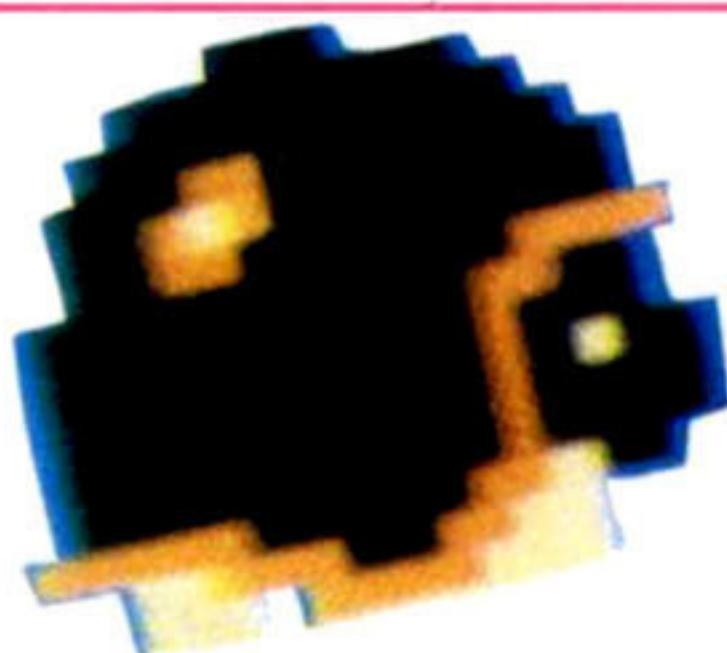

## KOOPA PARATROOPA

Watch out for the wily high-flying Turtle Aviator. The green ones are more troublesome than the red ones. They lose their wings when you stomp on them. Then they're just like regular TROOPAS.

Small fireballs connected in a chainlike fashion are called FIRE-BARS. Like PODOBOOs, they are indestructible. But with a little skill (and luck) you can get past them.

# THE DUAL WITH BOWSER, THE SORCERER

At the end of each world, you must face BOWSER, the evil King of Koopas. There are two ways to defeat him.

## 1. GET THE AX

AX

KOOPA

Once you get the ax, the bridge automatically topples and BOWSER falls into the sea of fire below.

## 2. REPEATING FIREBALLS

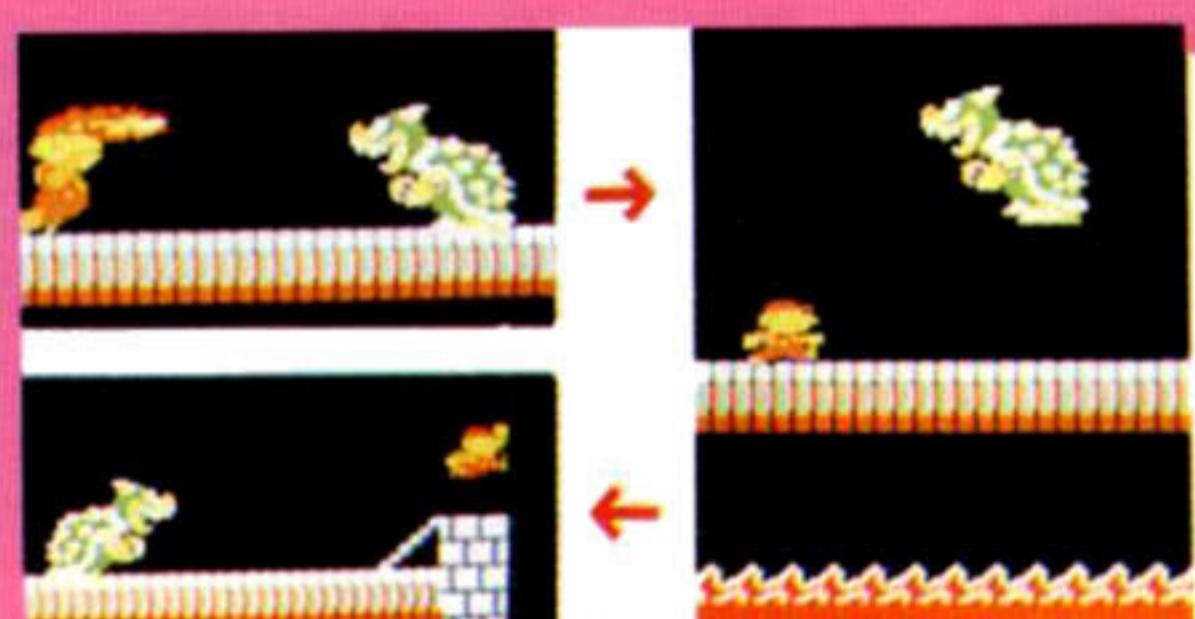

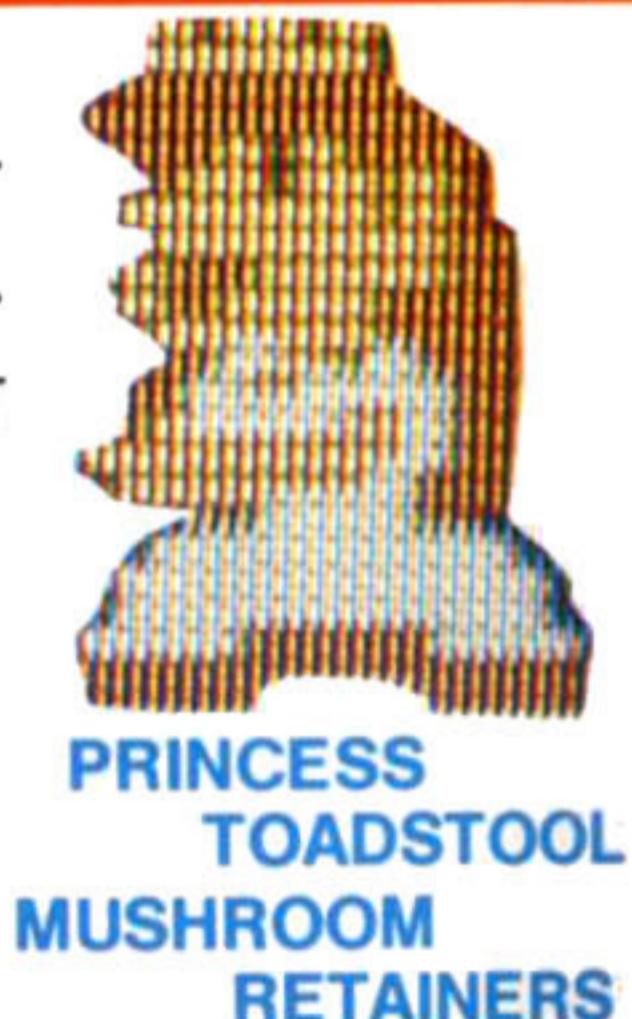

### AWAITING MARIO AT THE END OF EACH WORLD

Once you defeat BOWSER, you're supposed to find the fair Princess awaiting you. But alas, the Princess is held in another castle much farther away, and only her retainers are in the castle to greet you. The adventure continues!

The trick is to shoot BOWSER with five FIREBALLS in a row. But you have to be skillful to dodge his attack while you're trying to blow him away!

## SACRIFICE YOUR POWER AND CLEAR THE AREA

When SUPER MARIO becomes small as a result of enemy attack, he also become invincible for a few seconds. Use these valuable moments to quickly sneak past the unsuspecting BOWSER, and get the AX.

# **DESCRIPTIONS AND MAPS**

SUPER MARIO BROS. is a highly complex, sophisticated, and challenging computer game. There are many different characters all with unique attack patterns. There are hidden surprises that give you the advantage, and WARP ZONES that shoot you into other worlds.

To conquer all the worlds, you need to learn many tricks, and achieve a high level of skill. Here to help you are the fascinating secrets and inside tips on how to win.

# **ATTN. PLEASE READ THE BEFORE READING**

---

Now we're going to take you through the worlds of SUPER MARIO BROS. But before we show you the 32 levels that make up the Mushroom Kingdom, we would like to give you some tips on how to read the maps.

The maps are illustrations that give you an outline of each level. All the non-moving characters such as PIPES, BLOCKS, BACKDROPS, PLANTS, and CLOUDS are shown. The illus-

trations give you the overall look of each level, and help you get familiar with the obstacles. If you know the obstacles ahead of time, you'll get through each level more quickly.

Next, take a look at the arrows below the illustrations. They indicate where the "bad guys" are and the type of enemy you are up against. This information should help you come up with a successful plan of attack.

---

# **FOLLOWING INSTRUCTIONS THE DETAILED MAPS.**

---

Our warnings are not always completely accurate! Depending on the method and manner of your attack, the enemy zone described under the maps may change. Be ready for surprises.

Above and below the illustrations, you will find special comments and notations about hidden characters. It will be very useful to remember where the hidden surprises that give you the advantage are located. Also,

the rotational direction of FIRE-BARS and movements of LIFTS are indicated. Use these guides to help you successfully negotiate difficult screens the first couple of times.

We have also provided some handy facts that can be used by beginners as well as by experts to help you improve your skill. Learn these four key points and rescue Princess Toadstool from the evil hands of BOWER.

Hop onto the block to the left of the pit, then jump to the block with 6 coins. Get the coins, go to the far right block, and jump as high as you can. A 1-UP MUSHROOM will appear! Immediately punch the block next to the mushroom, and let it fall to the ground. Catch it! If you fail, the only way to get the 1-UP MUSHROOM is to chase it until there is a break in the ceiling. And beware! If you don't watch where you're going, you might wind up as lunch for a Piranha Flower.

The block next to the coin is a **P**.  
And the one next to that contains a  
**T** in the 2nd lower right position.

You'll find a **T** located one block left of the exit pipe.

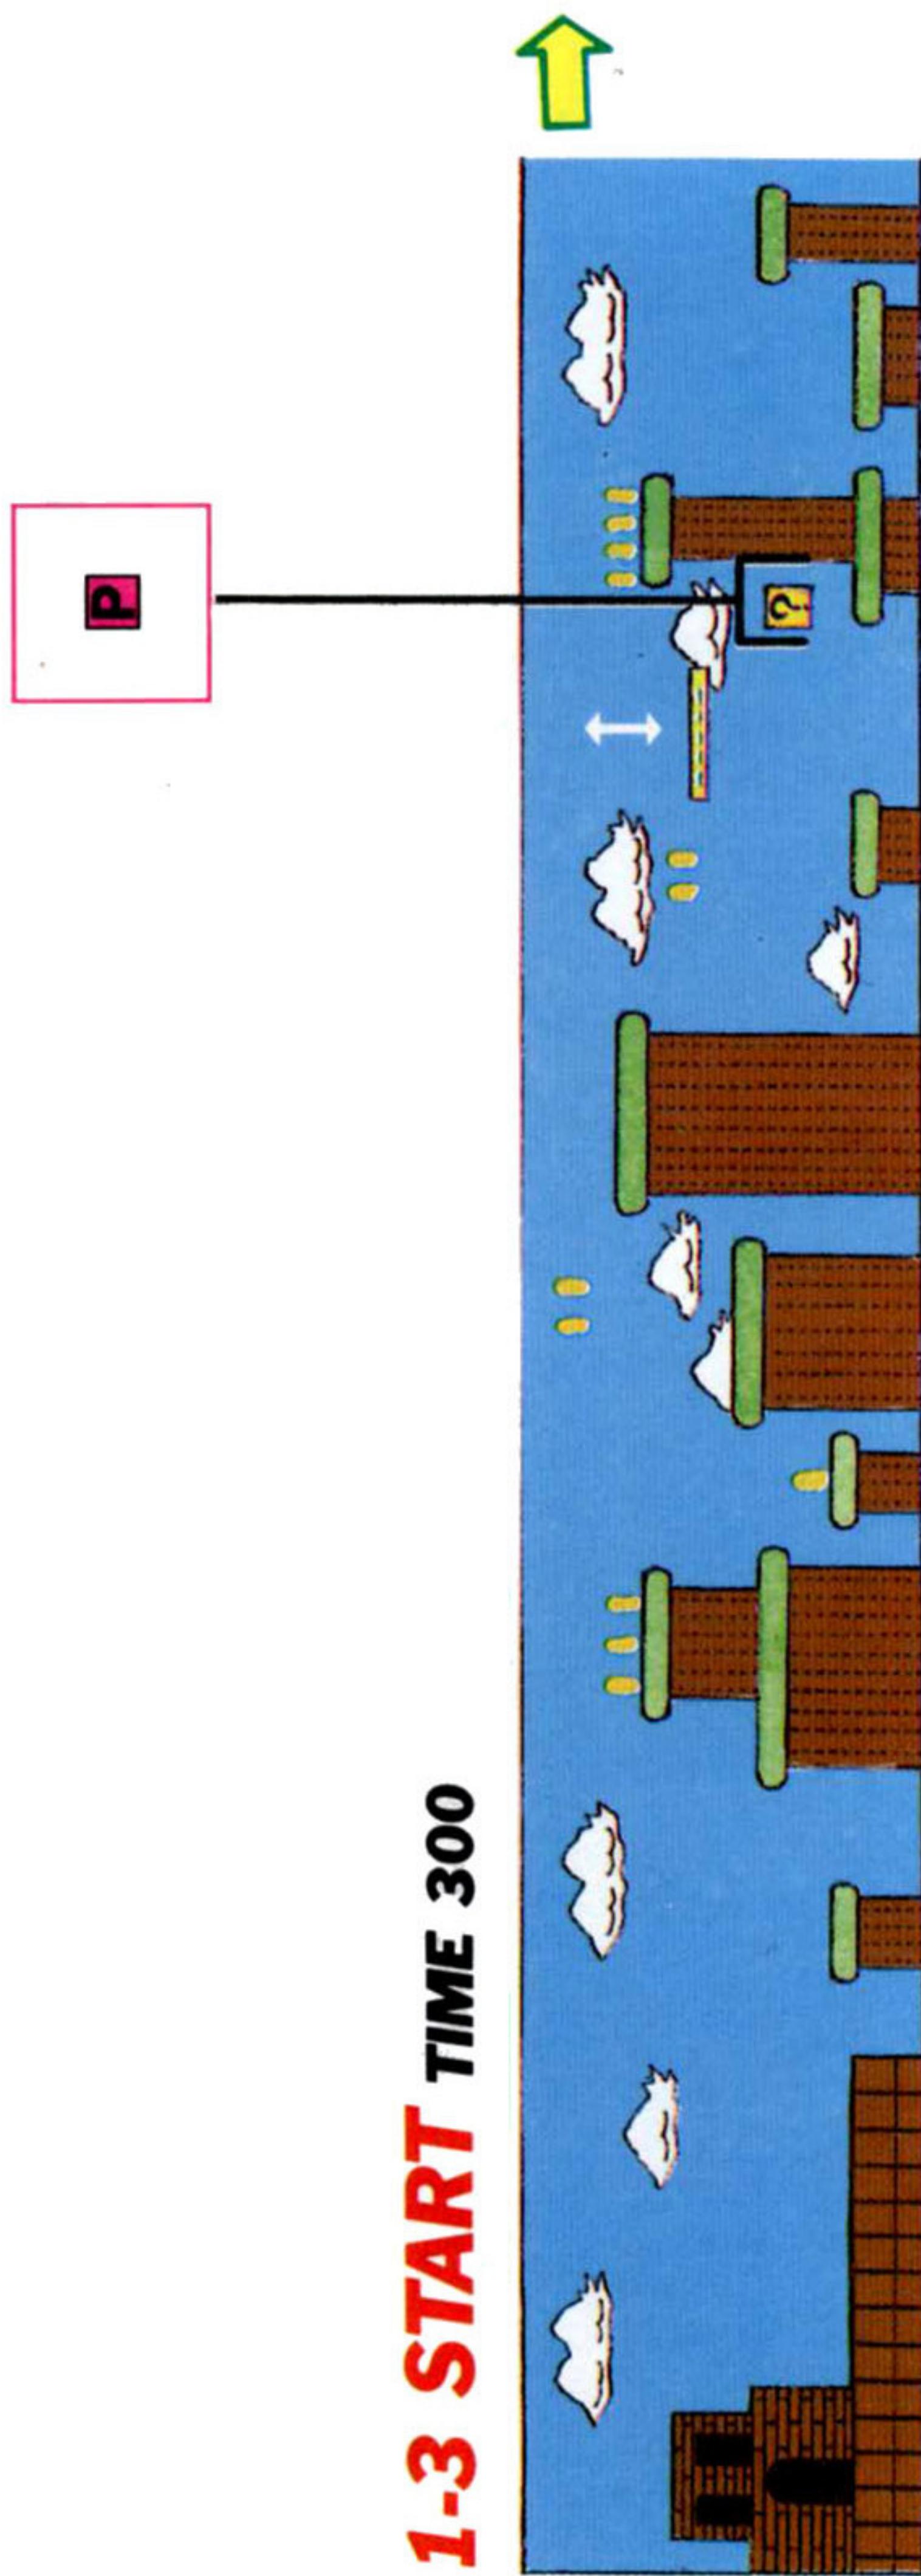

Two GOOMBAS will come down the stairs. Wait. Then stomp them at the perfect moment.

The flat block set contains a **P** in the block that's farthest to the right. If you jump onto the lift, and go to the ceiling, you'll find the first WARP ZONE which leads to worlds 2, 3, & 4.

The WARP ZONE. Pipes to worlds 2, 3, and 4 from the right.

# WORLD 1/LEVEL 3

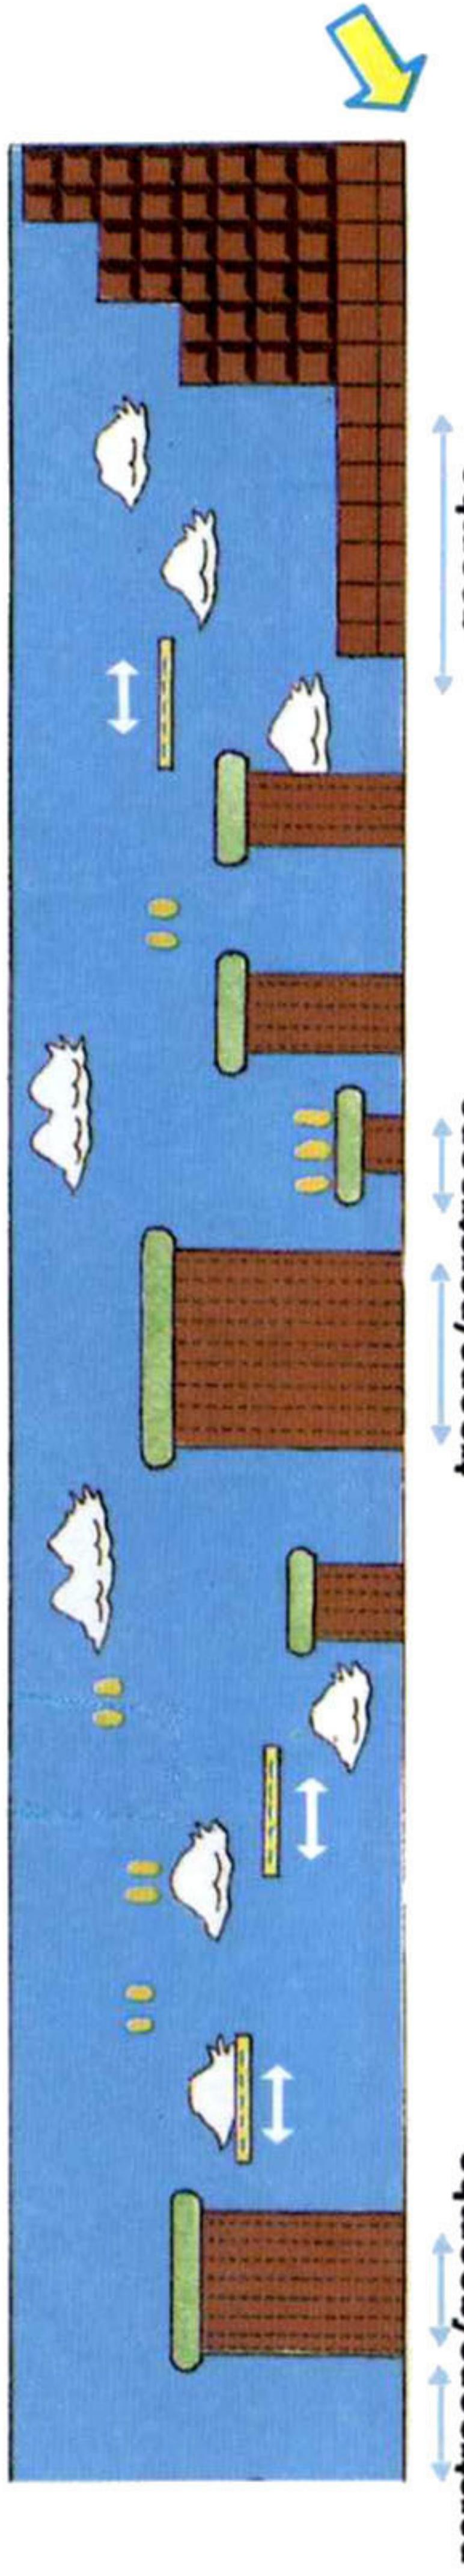

**1-3 START TIME 300**

The safest way to clear this place is to get the coins first, jump down to the lower island, and collect the **P**.

Careful! Unlike the TROOPAS, GOOMBAS will come down to get you!

The TROOPA in the higher island won't come down, so you can relax.

paratroopa/goomba

Meet PARATROOPA, the Flying Turtle. He can fly up and down, so you have to jump over him very carefully.

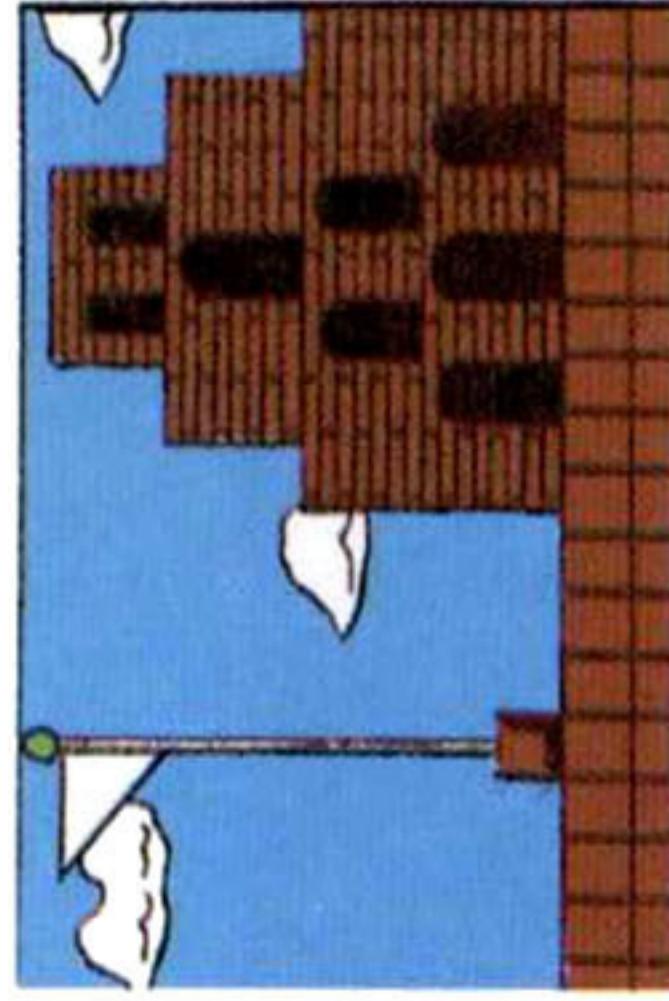

These lifts move horizontally. Wait until they are close together, and jump! It takes plenty of nerve, plus good timing!

### LEAP AND JUMP—THE POD WORLDS

No other challenges during the course of MARIO'S noble quest require as much athletic prowess as the POD WORLDS. Technique and timing are everything! Standing room is limited. The slightest wrong step will lead to a fall. The LIFTS are especially challenging. There are many different kinds of LIFTS, and together they present formidable obstacles. (See P. 47 for different types of LIFTS.)

On this level, you won't be able to spot your enemy until the last second, so be sure to use the map.

These FIRE-BARS look pretty difficult, but they're really a breeze. Watch your timing, and run when the bars are horizontal.

This FIRE-BAR rotates! Beginners should jump over it. Experts can go for the P inside the ? If you're just a regular MARIO, punch the ?, and jump on top of the ? block.

There are two ways to defeat the horrible KOOPA with FIERY MARIO. The easiest way is to shoot him with FIREBALLS. The other way is to pass him, get the ax, and cut the bridge down. When you're not

FIERY MARIO, you must opt for Plan "B." There are two tactics. One, you can jump over him, or two, duck underneath when he jumps. You'll probably find that jumping over him is the better strategy.

There are 6 hidden blocks, each with a gold coin. Punch the third block, and collect a C. Hop on top of this block, and do a ONE-FOOT jump to get to the next. Repeat this two more times, and collect 6 coins.

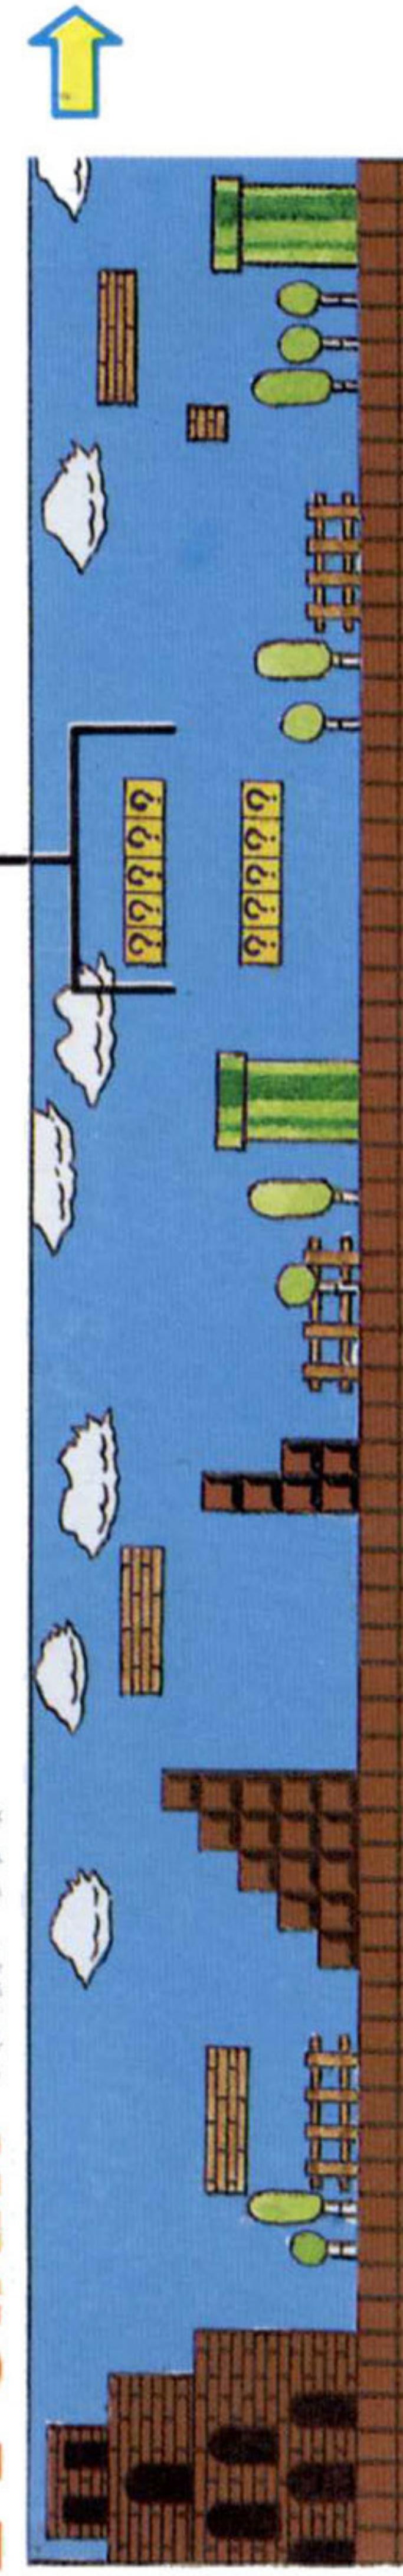

Here, your best bet is to jump over the bars just as they become vertical.

## YOU FIRST UNDERWATER ADVENTURE

The pipe at the starting scene leads to the UNDERWATER level. You'll meet new (and fishy) enemies like CHEEP-CHEEP and BLOOPER. Since this is your first underwater experience, you may find it difficult to control MARIO's swimming. Coral and drains present special challenges and thrills! Keep swimming!

**2-2 START**  
**TIME 400**

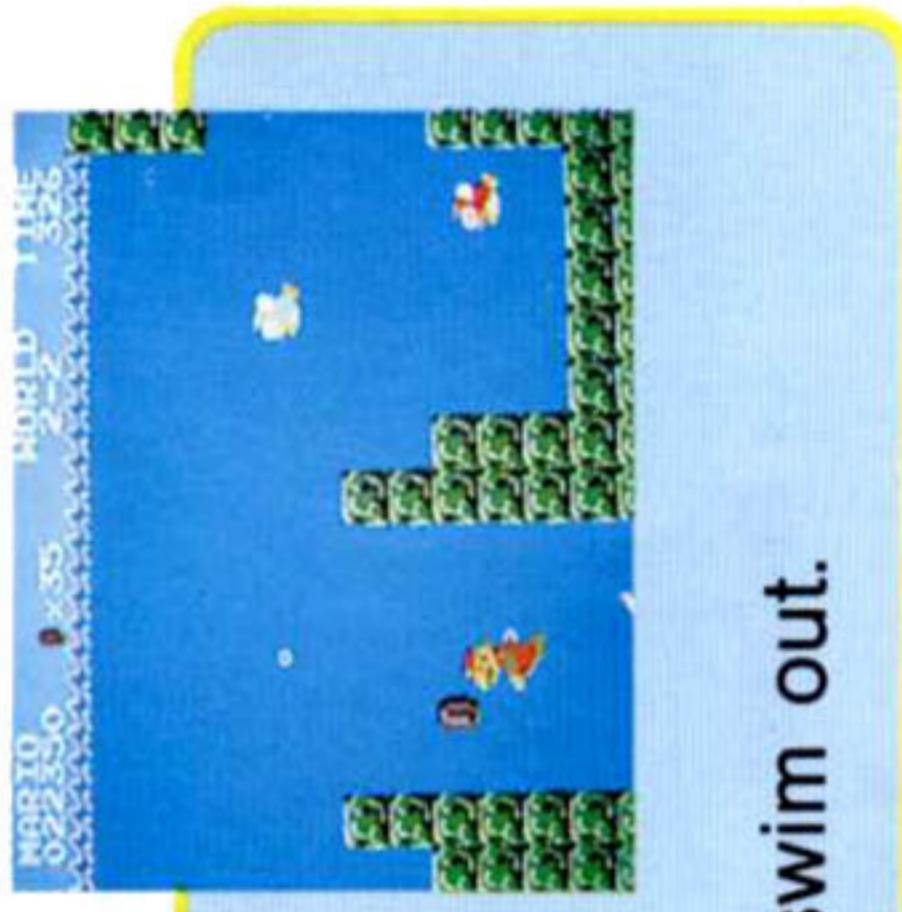

A hole in the ocean floor indicates a drain. Watch out. It can suck you down to the abysmal depths. Swim with all your might!

BLOOPERS cannot reach the ocean floor. So if you're small, you're quite safe. Even if you're SUPER MARIO, you can use the "down" button to kneel, and duck the enemy.

## TRY FOR COINS, BEWARE OF DRAINS!

Coin-collecting is part of the fun. But in the underwater world, it can be even more challenging. Coins are often located near the dangerous drains, and

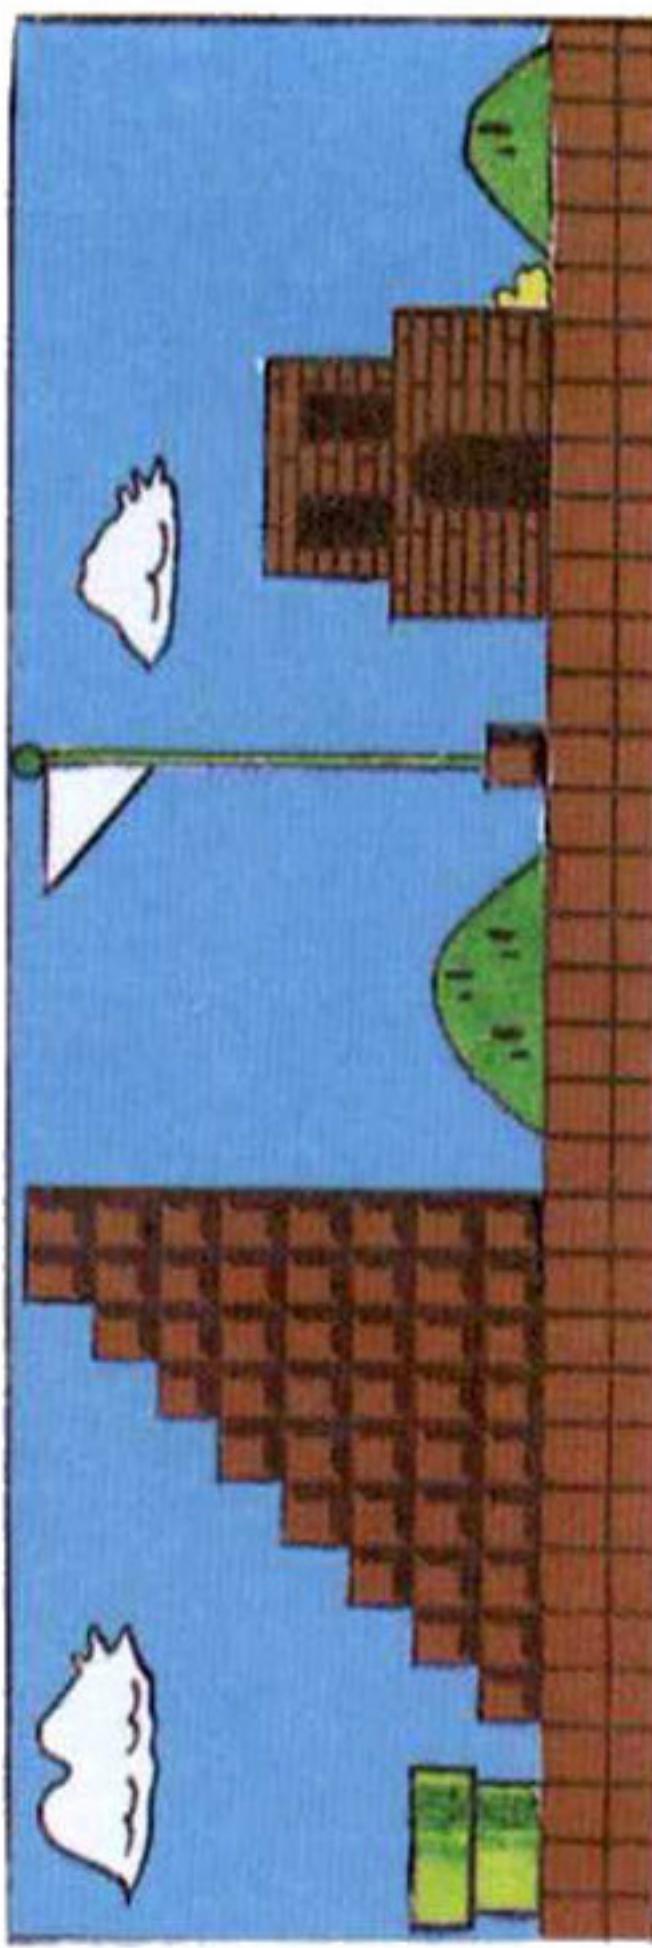

MARIO is especially hard to control. The best strategy is to get sucked down half way in order to reach the coins. Then push the "A" button repeatedly to swim out.

## MARIO TREMBLES

The map on page 34 shows a drain with L-shaped blocks on top. Go inside these blocks, and you'll see that MARIO trembles from the force of the rushing water as if he fears his enemies. Try it out when you have plenty of time!

Be especially careful of drains which are partly covered at the top. If you sense danger, scram!

The FLYING CHEEP-CHEEP attacks from under the bridge. Watch your timing! If you leap at the wrong moment, it could be your last.

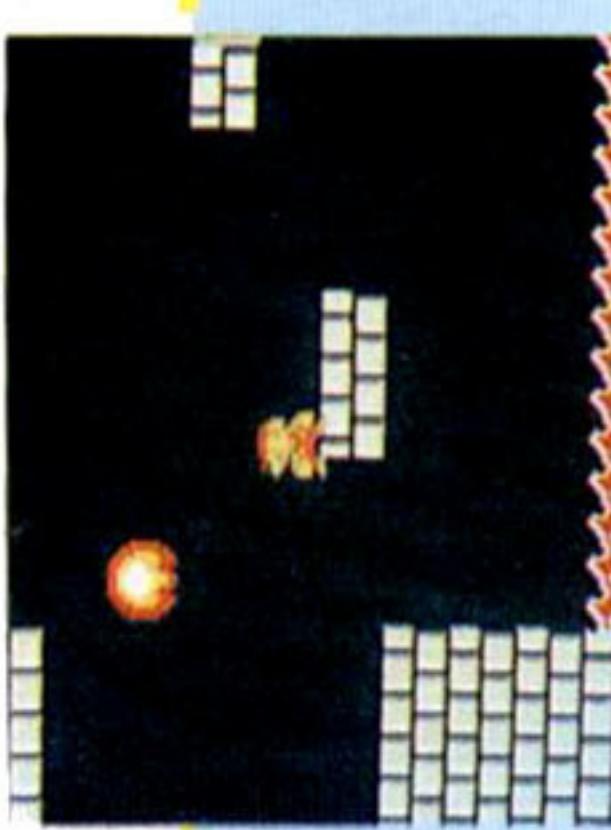

These bridge sections are very short. The best way to clear them is to cross the sections one at a time. Jump to get the coins, stop, and then jump to the next section. Once you get the hang of it, you'll be able to cross quickly.

Your initial encounter with the fiery PODOBOOS will be near the first two-block set. PODOBOOS are quick. And they fly high to get their victims. They are also roughly the same in size as regular MARIO—small but nasty.

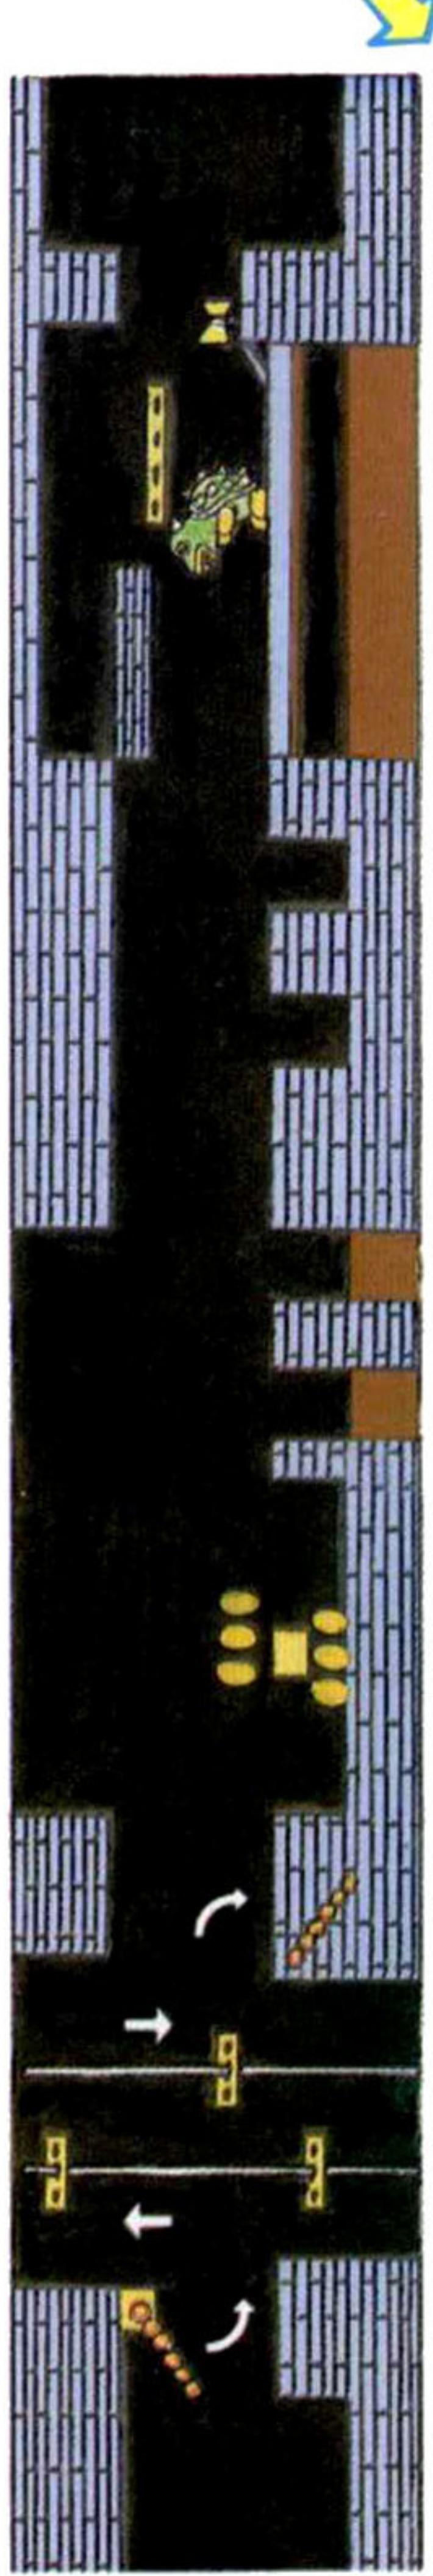

## 2-4 START

TIME 300

Watch for the the PODOBOOS when you jump onto these blocks above the pit. The ? contains a P, but it's tricky to get. Jump from the far right block in the center block set.

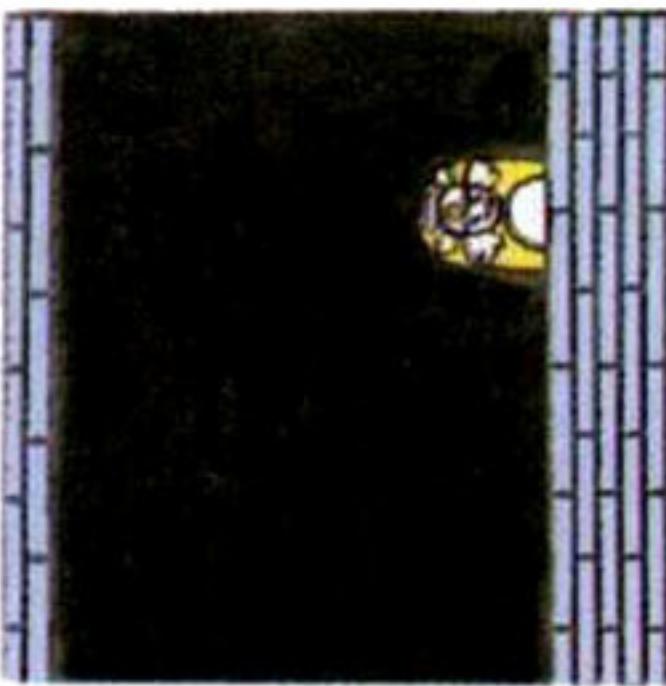

koopa's fire

Here are a few pointers to help you successfully negotiate the LIFTS. Before you jump, get to the edge. If you're not right at the edge, you'll bump your head on the roof, and fall into the bottomless pit. You also have to be very quick to avoid the FIRE-BARS.

Once on the LIFTS, you can relax because you can't get bumped off. But don't forget that the evil KOOPA's fire comes all the way out here.

Skillfully dodge the flames, and collect the coins. To get coins below the blocks, run and push the "down" button. MARIO will slide under the blocks in a kneeling position.

Punch the right block and find the beanstalk that leads to the SKY BONUS. Once the beanstalk is out, you can jump down to the left, and use the JUMPER to get to the beanstalk.

## POINTS DEPEND ON HOW YOU KILL THE ENEMY

### I. MULTIPLE KILLS

When enemies approach you in great numbers, get them in a row to score high points. Points will double (100, 200, 400) for each enemy you get. GOOMBAS are the best foes on which to test this technique.

### IV. OTHER SECRET TACTICS

There is a tactic called "WAIT AND RE-STOMP" where you can wait for the turtle to revive after you stomp it, and then stomp it again for a high score. This "DOUBLE STOMP" tactic will change the 100 + 400 score into a 100 + 500 score.

When you stomp on two enemies at a time, your score increases accordingly (100 + 400).

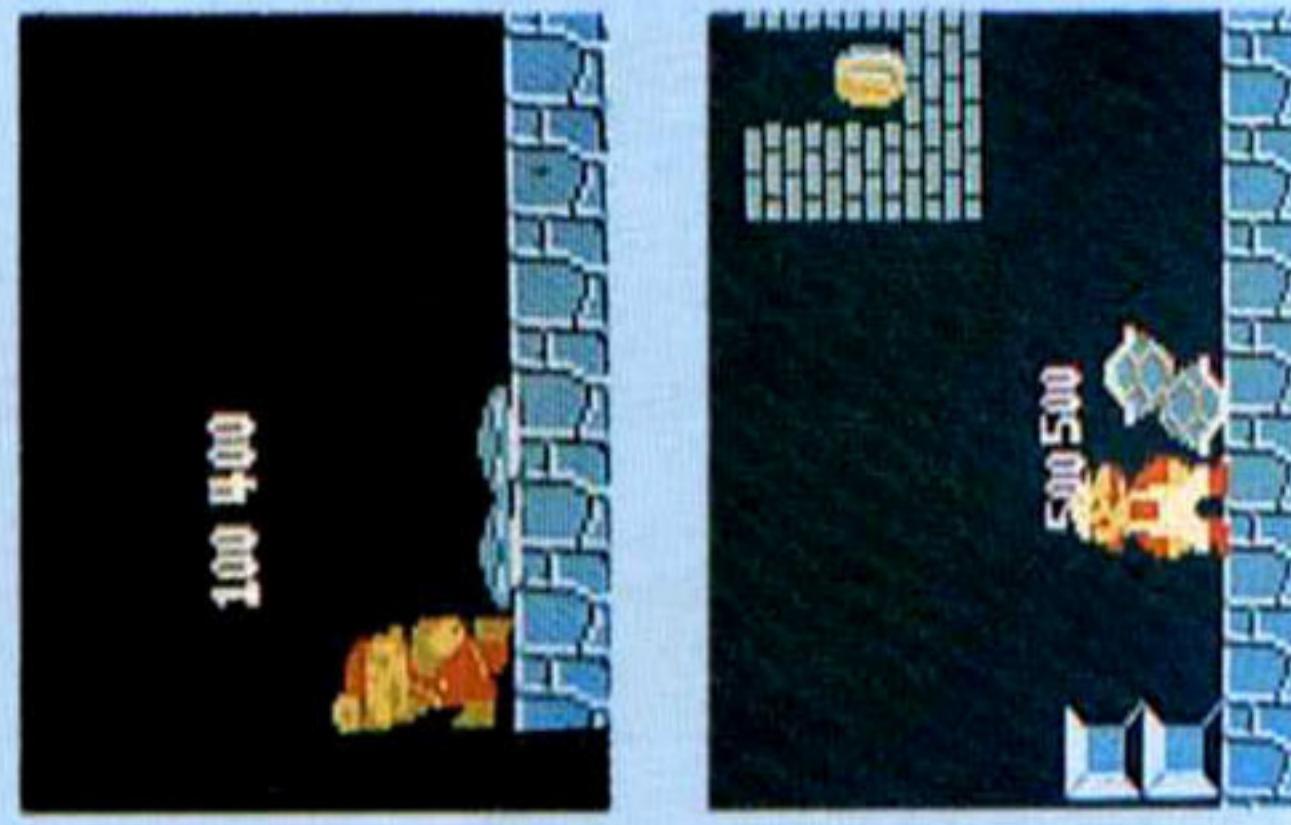

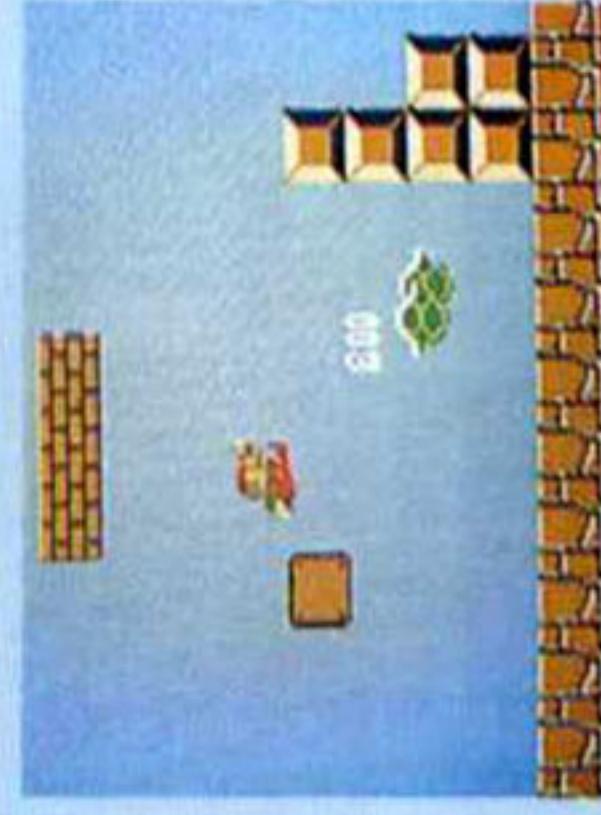

### II. DOUBLE KILLS

### III. KICK AND RUN

When you use the stomped turtle to defeat the other enemies, your score will increase with each additional kill (500, 800, 1000, 2000, 4000, 5000, 8000, 1-UP). If you do this enough times, you'll get an extra life!

# WORLD 8 / LEVEL 4

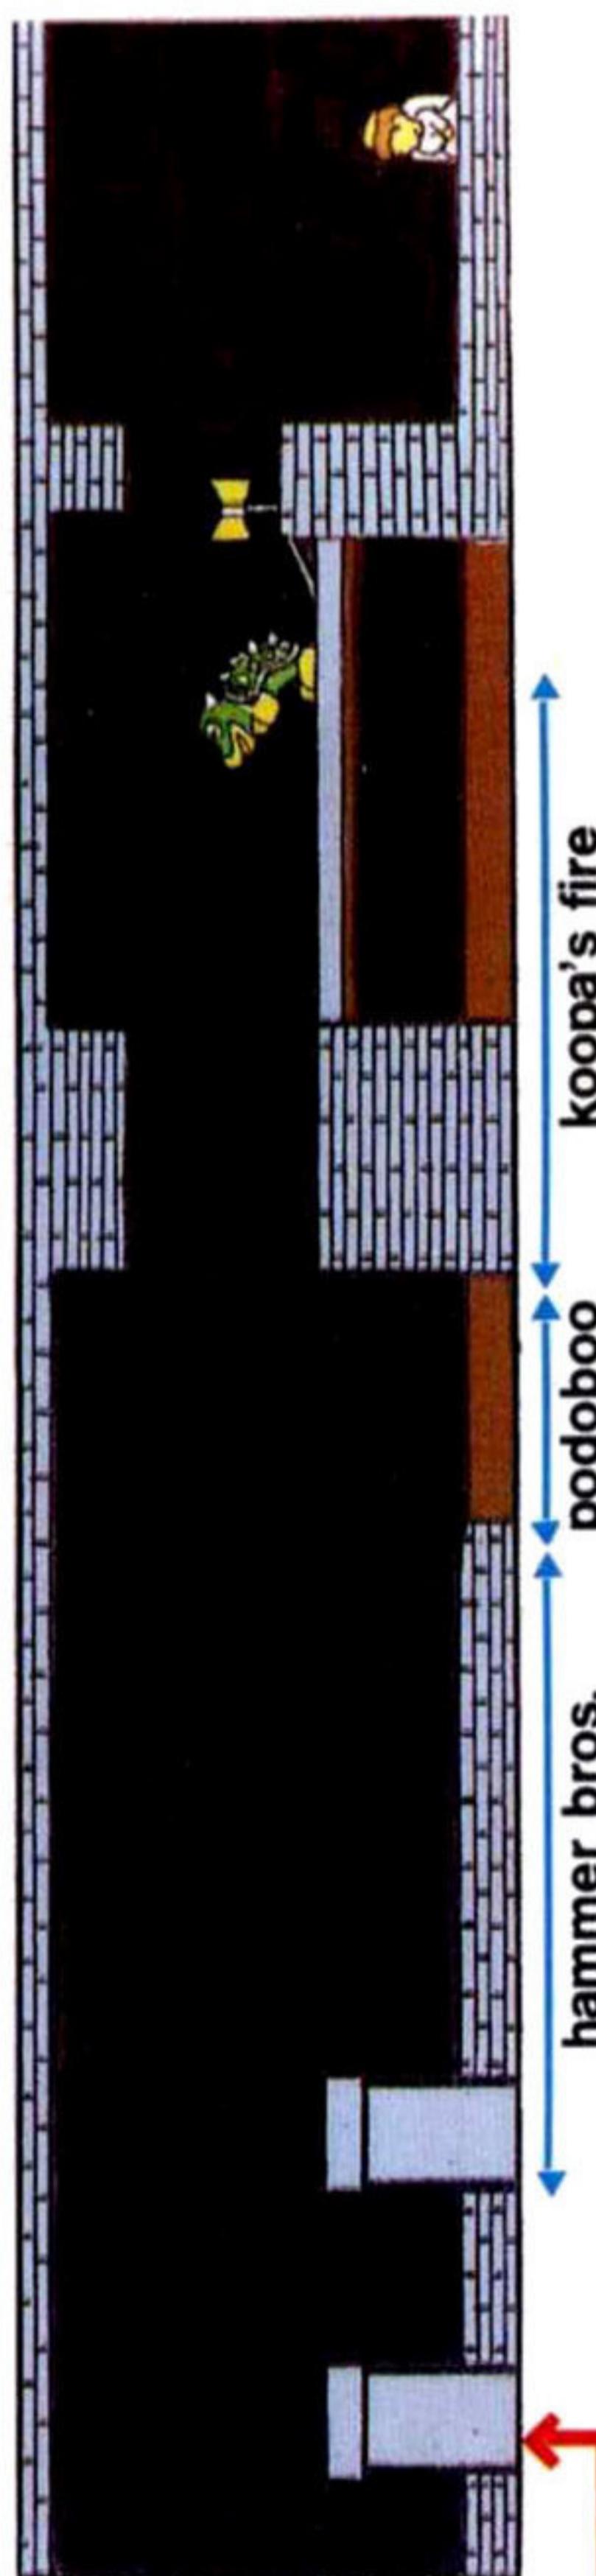

This pipe leads to the pipe in the beginning of this area.

The only enemy in the underwater area is BLOOPER. If you are not FIERY, it's safer to stay close to the bottom.

Get on top of the pipe on the right, and take time to observe the movement of the HAMMER BRO'S. If they don't throw their hammers while they jump, it's a good time to make your move.

Use the "accelerate/jump" sequence to jump behind them, and quickly jump over the Bog of Flames.

This is the real BOWSER! Use the "tried and true" technique to defeat him.

## HOW TO USE THE WARP ZONE.

There is a WARP ZONE in WORLD 1/LEVEL 2 and WORLD 4/LEVEL 2. The WARP ZONE is useful in avoiding enemies, and offers a speedier route to PRINCESS TOADSTOOL. By using the WARP ZONE, you can bypass many of the BOWSERS, and skip over especially troublesome worlds.

Although very useful, there is a negative aspect to the WARP ZONE. For instance, if a beginner tries to use the WARP ZONE without enough practice, he/she will not be able to go much beyond that point due to lack of experience.

The worlds gradually become more difficult. Each building on the next to add to your skill level. Exploring new worlds, meeting new challenges and characters is also a major part of the fun. You miss a lot of action by skipping worlds just to get to World 8.

Probably the best way to use the WARP ZONE is to use it as a tool to advance your skill level. Once you get a good feel for the game, use the WARP ZONE with discretion to sharpen your skills.

This is the warp zone in World 4 Level 2. You can only warp to World 5 from here.

This is also a warp zone in World 4 Level 2. When you warp from here you'll end up in an unexpected place!

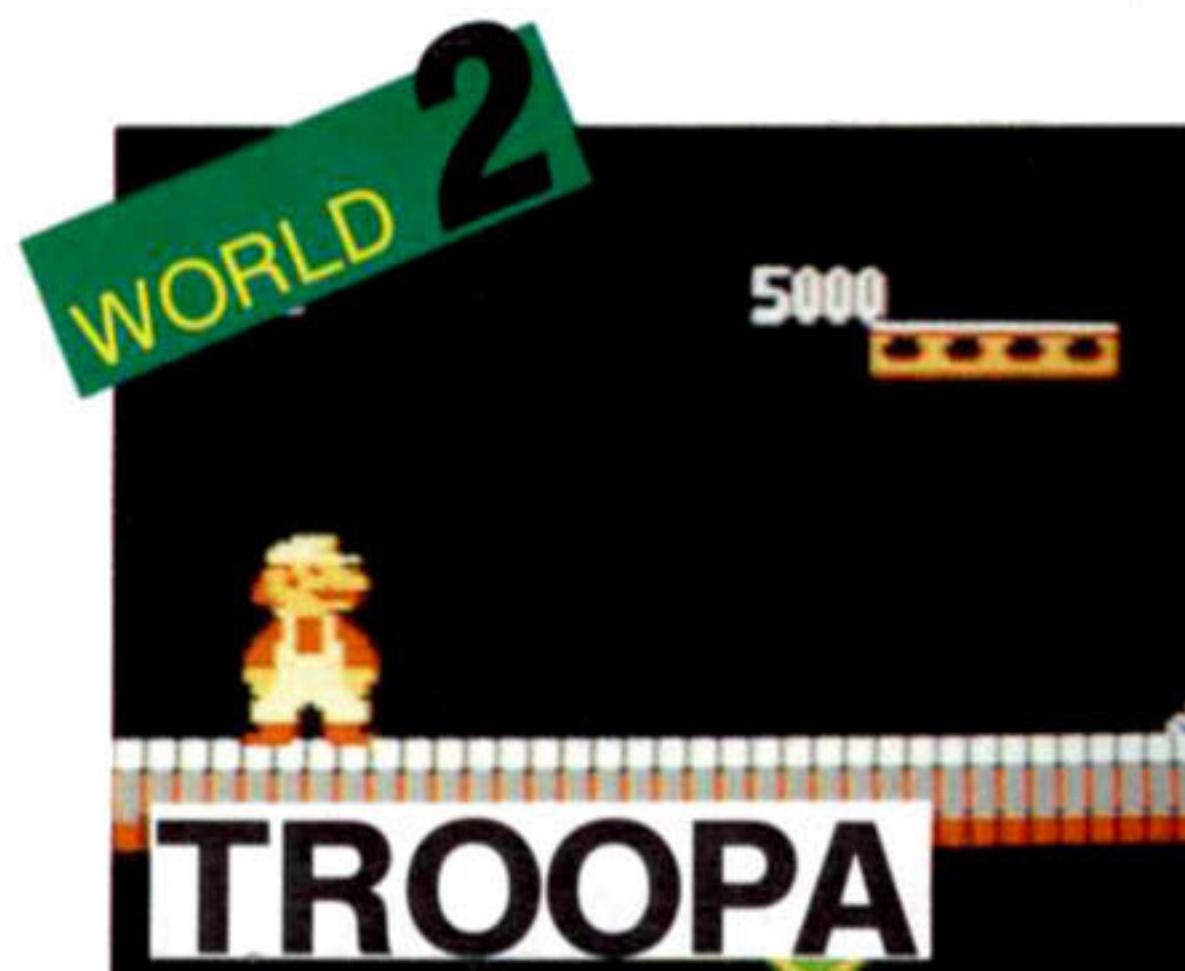

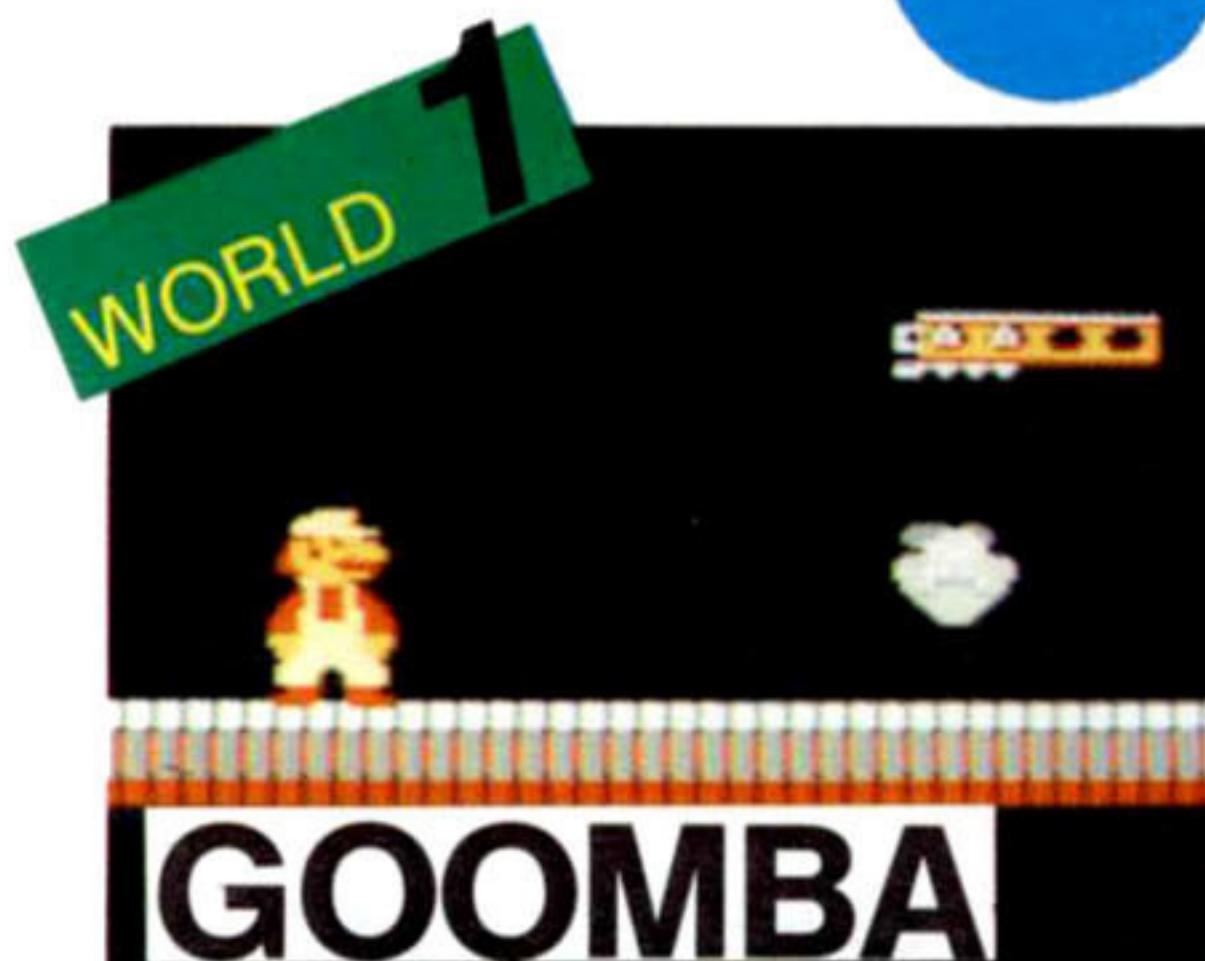

## **3 SECRETS OF KOOPA AND ANOTHER QUEST**

KOOPA's identity is finally revealed when you complete the game. You have conquered the entire Kingdom all the way to World 8/LEVEL 4. In addition to that, you are given a new mission—to conquer yet another Kingdom! We would like you to figure out the secrets for yourself, but if you just cannot wait, here it is!

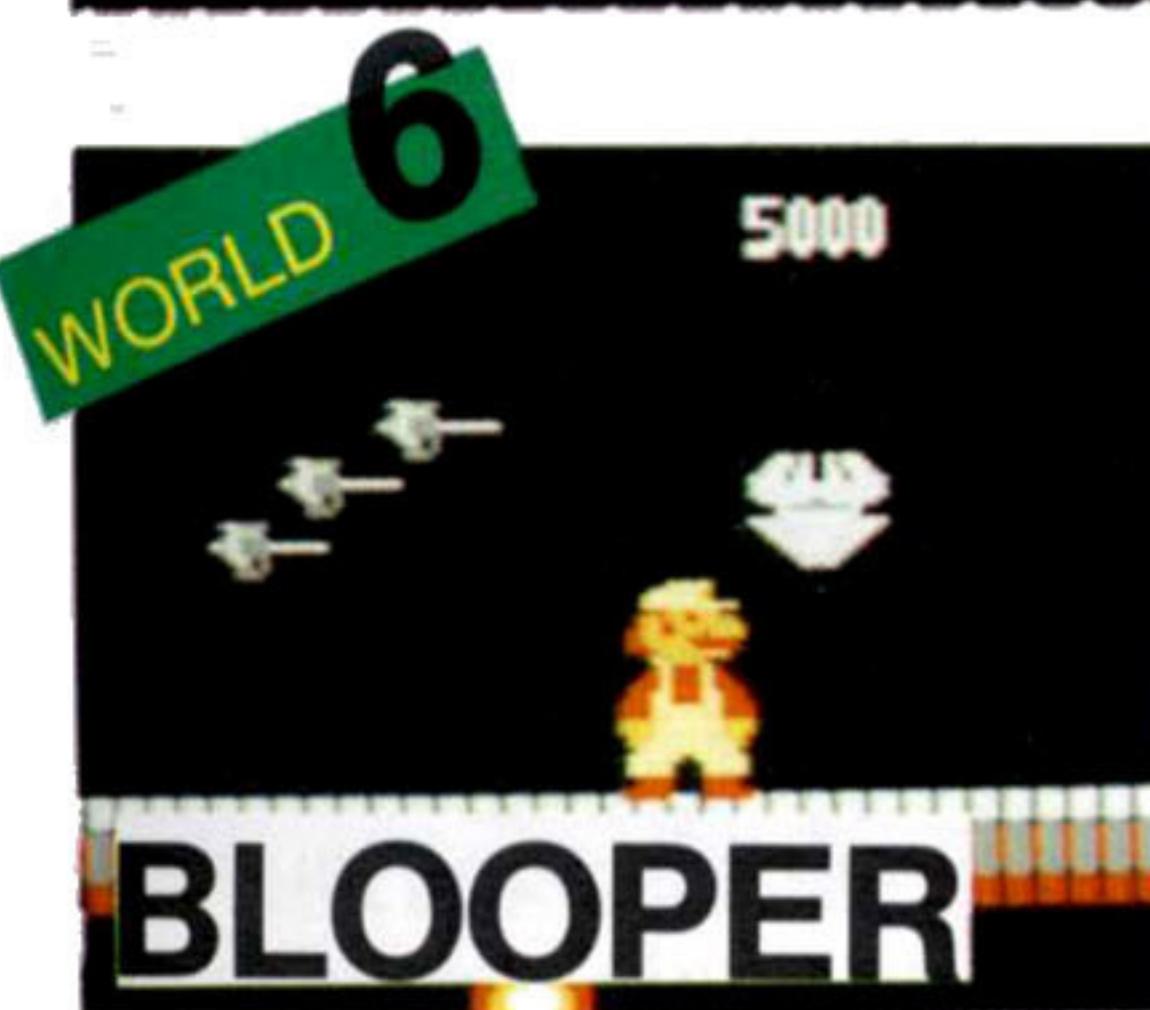

# THE IDENTITY OF KOOPA

BOWSER, the evil King of the KOOPAs has been defeated by our hero, MARIO! But why did he have to fight against eight different BOWSERs? This secret is revealed in the photos above. In reality, the BOWSERs you defeated in Worlds 1 through 7 are other creatures disguised as BOWSER. In other words, they are fakes. Their identities are only revealed when you kill them with FIREBALLS. Check it out.

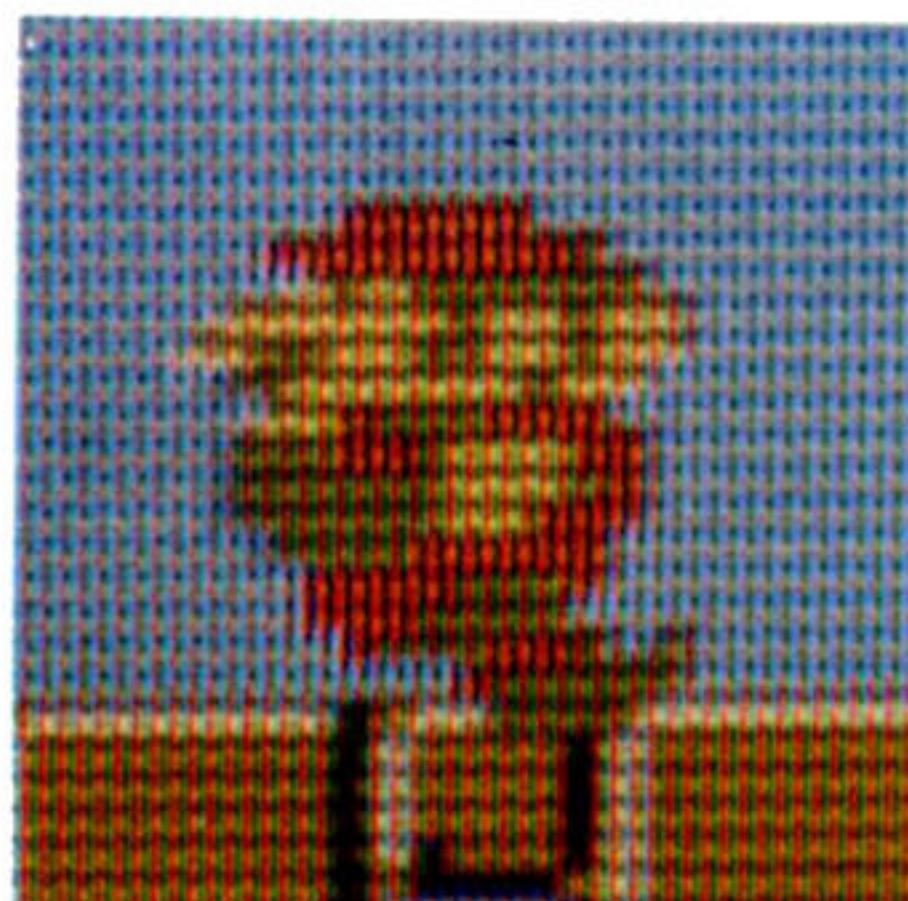

Finally, you have saved the PRINCESS TOADSTOOL from the evil rule of BOWSER. You have come a long way! Did you notice various secrets revealed by MARIO on the road to victory? There are stories within stories in this game.

# A NEW QUEST AWAITS MARIO!

The story has come to an end, and MARIO and PRINCESS TOADSTOOL are surrounded by a glowing light. The light spread, growing outward to envelop the entire MUSHROOM KINGDOM and free all the creatures from the evil spell of BOWSER.

Finally, peace returns to the MUSHROOM KINGDOM, and the faithful subjects are restored to their rightful places. But listen, PRINCESS TOADSTOOL is trying to tell MARIO something!

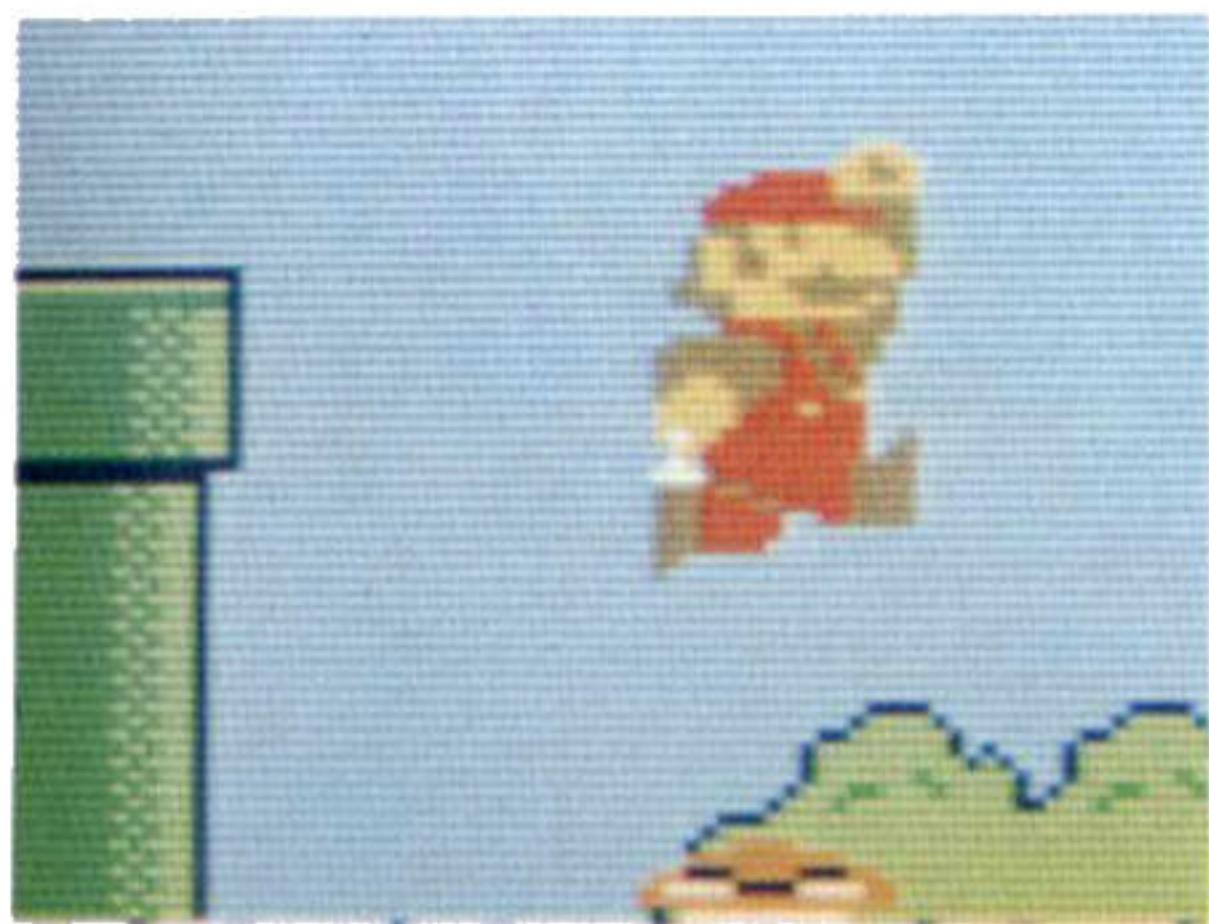

When MARIO regains consciousness, he finds himself in another land. It's like the MUSHROOM KINGDOM, yet different. Again MARIO must save the PRINCESS held captive in a castle far away.

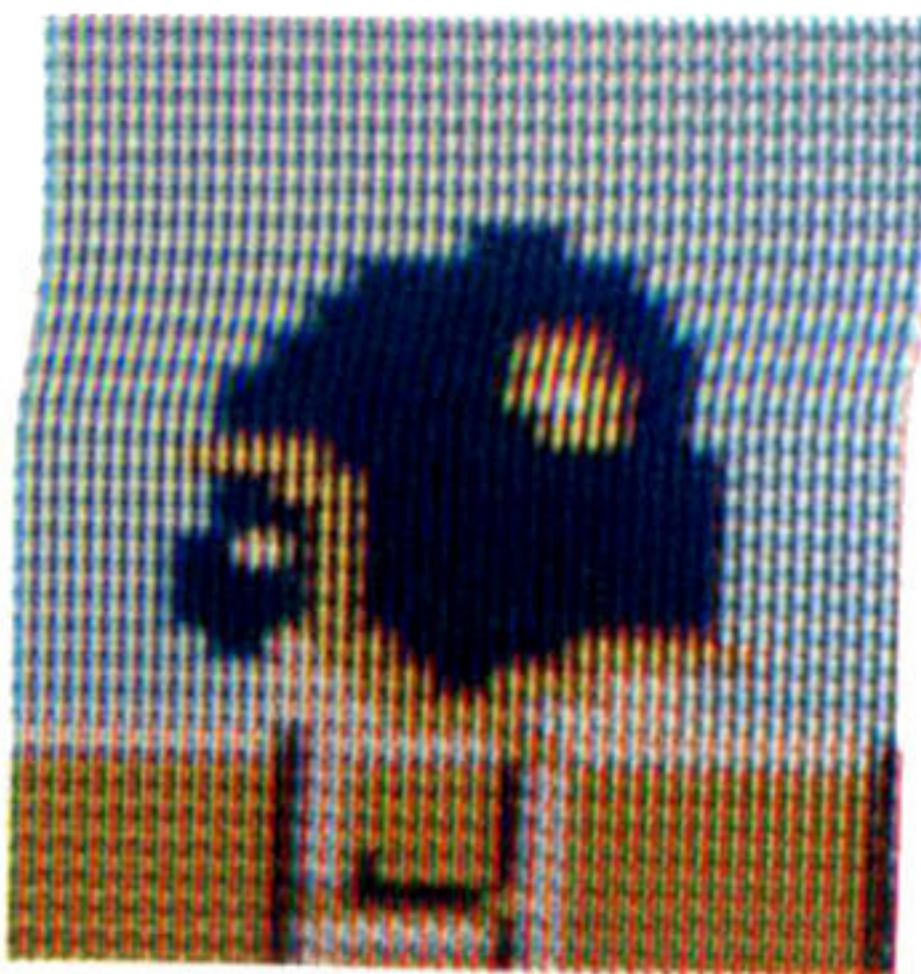

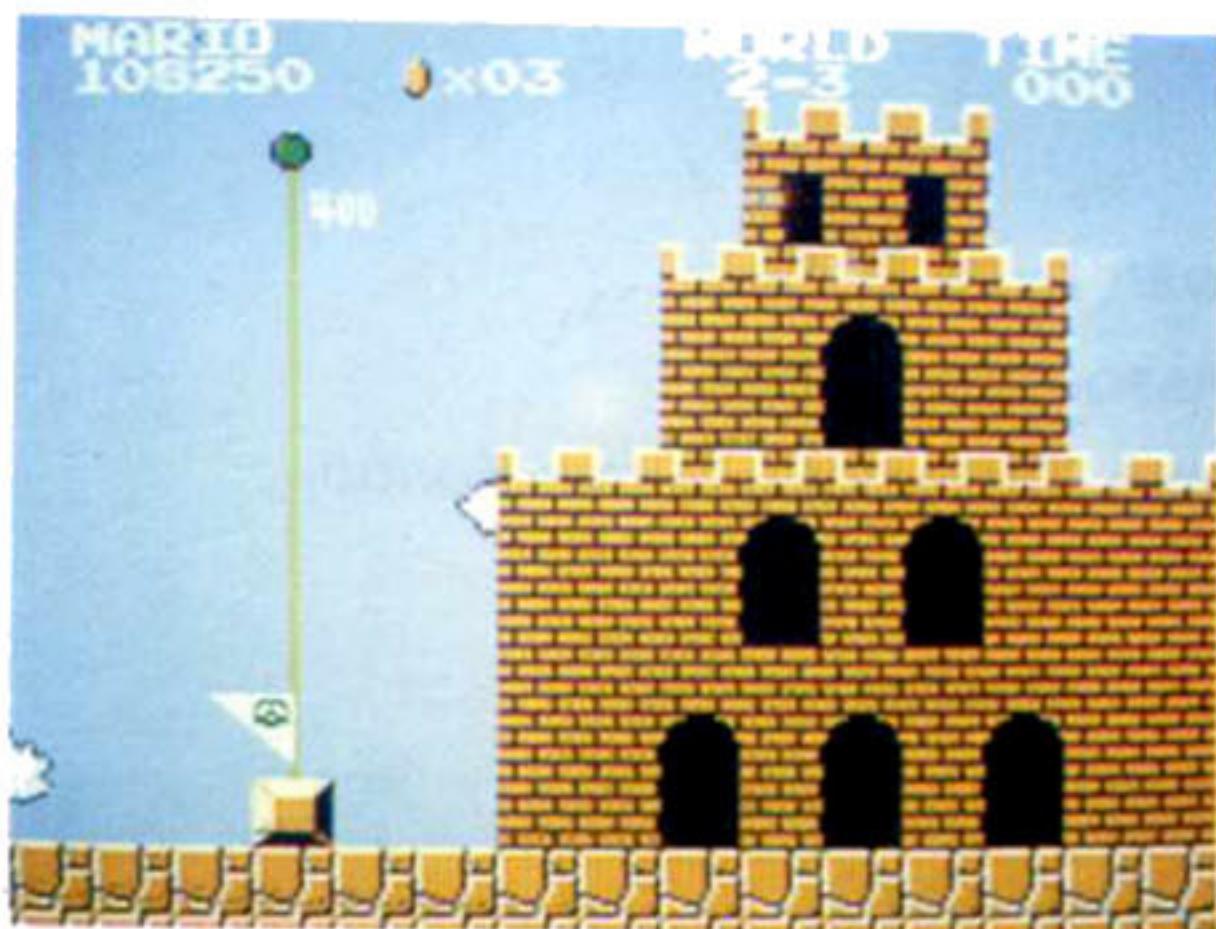

"Thank you, MARIO! Your courage has freed our Kingdom, and your long journey is now over. To show our gratitude, we have prepared another quest for you." MARIO, totally astounded exclaims, "I have to go on another journey? That's crazy!" Dizzy with the news, MARIO keels over.

While the title screen is on, you can use the “B” button to select the world you want to play. For now, take a look at what world 1 looks like. Although completely exhausted, MARIO gets back on his feet.

The first enemy approaches! BUZZY? What's this? The first enemy is supposed to be GOOMBA! That alright, let's get them all. But something is strange here!

“MARIO, MARIO, don't take this world lightly! It's a totally different world, and your enemies are placed differently, too!”

Did MARIO hear the Princess' parting words? Maybe not, but you did. Use this book as your guide to challenge the UNDER WORLD!
